You may have heard there is a limited availability of natural gas locally this winter. That's why SoCalGas® may ask you to help conserve on certain days by issuing a SoCalGas Advisory to promote reductions in natural gas consumption.

If a "**SoCalGas Advisory**" is called,
let's **Dial-It-Down**.

Tips to help conserve natural gas:

- Lower your thermostat to 68 degrees
- Wait a day to use major natural gas appliances
- Wash with cold water when possible
