**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

Joint Application of SAN DIEGO GAS & ELECTRIC COMPANY (U 902 G), SOUTHERN CALIFORNIA GAS COMPANY (U 904 G) and PACIFIC GAS AND ELECTRIC COMPANY (U 39 G) to Reallocate the Costs of Natural Gas Public Purpose Programs and Other Mandated Social Programs Among Customer Classes.

Application No. 07-12-____

APPLICATION

Pursuant to Public Utilities Code Section 454 and the Commission’s Rules of Practice and Procedure, San Diego Gas & Electric Company (SDG&E), Southern California Gas Company (SoCalGas) and Pacific Gas and Electric Company (PG&E) (jointly, “the Gas Utilities”) jointly submit this application requesting authority to change the methodology by which natural gas customers of the Gas Utilities are charged for the costs of Public Purpose Programs and other social programs required by the Legislature or this Commission. Specifically, the Gas Utilities request that, beginning January 1, 2009, they be authorized to allocate the costs of Public Purpose Programs and other social programs to their customers on an Equal Percent of Base Revenues methodology.

I. INTRODUCTION

Over the past several years, the Legislature and this Commission have implemented many social programs to be paid by utility customers, including energy efficiency, low-income energy efficiency and public interest research and development programs (Public Utilities Code §§ 890-900); the California Alternate Rates for Energy (CARE) program to provide rate discounts for low income energy utility customers (Public Utilities Code § 739.1); the Self

Generation Incentive program (Public Utilities Code § 379.6, with gas utility customers ordered to pay for part of the program costs in Decision 01-03-073, Findings of Fact 3 and 4); and possibly a solar thermal hot water heating program, currently pending in the Legislature (Assembly Bill 1470), if it is enacted into law.

Over the past several years, the Commission has authorized different cost allocation methods for the Public Purpose and social programs of the Gas Utilities, including:

- Equal cents per therm for the CARE program and the State Board of Equalization's administrative costs for all the Gas Utilities;
- Direct Benefits¹ for the Energy Efficiency programs;
- Direct Benefits for PG&E's Low Income Energy Efficiency program;
- Equal cents per therm for PG&E and SoCalGas' Self Generation Incentive programs and PG&E's Research and Development program; and
- Equal percent of margin contribution for SoCalGas and SDG&E's Research and Development programs and SDG&E's Self Generation Incentive program.

At the time the cost allocation methods for the gas Public Purpose and social programs were originally adopted, no one anticipated the dramatic growth in the cost of the programs.

Therefore, now is a good time to revisit the issue.

II. THE GAS UTILITIES PROPOSAL

The Gas Utilities propose a single, unified cost allocation method for recovering the gas costs of all Public Purpose and other social programs for the three major gas utilities. The proposed method is equal percent of base revenues, which is a cost allocation methodology that

¹ The Direct Benefits allocation method assigns costs to customer classes in proportion to that classes' receipt of program dollars.

assigns costs to individual customer classes based on the same percentage of base transportation revenue allocated to each customer class. Base revenue is defined as basic gas service, including:

Base Revenue =	Customer Costs (Including service lines & meters)
+	Distribution Costs (Including medium and high pressure system)
+	Transmission Costs

For the reasons set forth in the testimony being served concurrently with this application, the Gas Utilities believe that this change will result in a more fair, simple, and uniform allocation of gas Public Purpose and social program costs. This change will support the California economy, the competitiveness of California businesses, the competitiveness of the Gas Utilities in serving medium and large business customers, and provide a more equitable foundation for social program cost allocation appropriate for ever-growing costs. To ease the transition to the new cost allocation, the Gas Utilities propose to phase in the change over three years, with the resulting percentage changes in allocations and rates for the different customer classes:
