Beginning of Workpaper 2FO000.000 - Customer Service Field Operations

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward

Category: A. Customer Service Field
Category-Sub 1. Field Ops-CSF Operations

Workpaper: 2FO000.000 - Customer Service Field Operations

#### **Activity Description:**

Labor and non-labor costs associated with the following activities: Initiate or close gas service without entering the customer's premises; collect payments for delinquent bills; conduct appliance checks; investigate for gas leaks; close and restoration of service for fumigation; investigate the causes of a high bill; replace customer meters; restore service after it was closed for non-payment of the gas bill; verify the meter reasd or other conditions at the customer premises; initiate and close service when entrance to the customer's premises is required; miscellaneous meter and regulator work; food industry orders; commercial and industrial service work; and, other miscellaneous residential and commercial orders.

#### Forecast Methodology:

#### Labor - Zero-Based

Field Operations expense is driven by many variables including order activity, off-premise time, drive time, etc. The fluctuation of these variables would not be represented in historical averaging or trending of expense, thus a zero based budget using the average of order activity along with the most recent trend of exogenous variables is most suited for this area.

#### Non-Labor - Zero-Based

Field Operations expense is driven by many variables including order activity, off-premise time, drive time, etc. The fluctuation of these variables would not be represented in historical averaging or trending of expense, thus a zero based budget using the average of order activity along with the most recent trend of exogenous variables is most suited for this area.

#### NSE - Zero-Based

NSE is not applicable to this workgroup.

\*Hours in the DART Off Production Analysis Report are extracted from PACER, the system that records activities performed by CS field. Adjustments have been made to "Total Hours Worked" in order to align the PACER hours with the actual recorded hours reflected in the payroll system. Adjustments made to "Training" are for hours charged to formalized training that are not documented in PACER.

Vote: Total Off Production time shown on this report does not include morning and evening setup and shutdown time (AM/PM-34 minutes per FTE per work day) and does not include lunch breaks (30 minutes per FTE per work day)

- stating that it has already accounted for it in the GRC. 93 Relying on the GRC again,
- 2 SoCalGas also makes an adjustment to the current travel time due to expected traffic
- 3 increases. 94 SoCalGas's estimated increase per year is a flat tenth of a minute (6 seconds)
- 4 per trip (10.24 minutes). For 2008 this represents a hair under 1%, but since the annual
- 5 increase is always a flat 6 seconds, rather than a percentage, it does not increase over time
- 6 with the travel time increase. Therefore, the percentage of the total that this 6 seconds
- 7 represents, keeps on decreasing. By the time 2034 arrives, a six second change makes a
- 8 0.79% increase. 95

15

16

17

18 19

20

21

Since traffic can change dramatically and tends to increase over time, a projection of annual drive time increase of less than 1 percent has the potential to seriously underestimate actual drive times. DRA therefore suggests increasing the congestion forecast from an annual increase in drive time of 6 seconds (which is slightly less than 1%) to an annual increase of 2.5%. For a 10.24 minute trip, this would mean that after four years it would be approximately 10% higher, or 11.26 minutes.

A fourth oversight regarding SoCalGas's module replacement costs is that it failed to include training material costs for the new task (module replacement). This would include educational materials, demonstration materials (test meters and modules) and presentation materials. While these costs are not trivial, for the time being DRA sets them aside. DRA proposes that post deployment costs be increased \$12.3 NPV dollars based on its other three findings in this cost area: a) deficient meter failure rates, b) inconsistent labor rates, and c) unrealistic traffic congestion projections. The DRA proposal in nominal dollars is a \$45.9

<sup>&</sup>lt;sup>93</sup> Summary of Errata, p.1, presented at meeting with SoCalGas March 19, 2009.

<sup>&</sup>lt;sup>94</sup> SoCalGas Workpapers, March 6, 2009, Chapter III, Fin Temp\_CSF 6(1).1, Worksheet Forecast Minutes, cells AB3:BD5.

<sup>95</sup> SoCalGas Workpapers, March 6, 2009, Chapter III, Fin Temp\_CSF 6(1).1, Worksheet Incremental Read and Verify, cells AB14:AC14. 0.079% = 6 seconds / 12.68 minutes

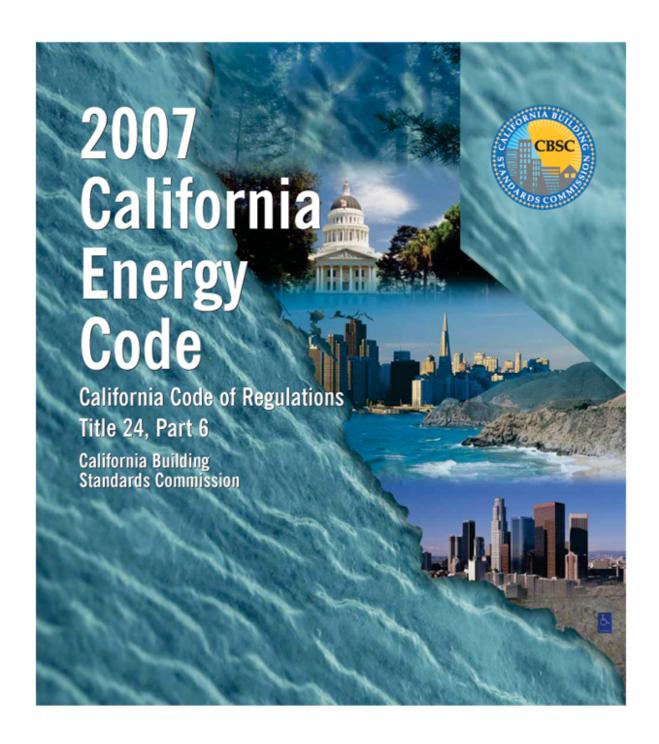

<sup>96</sup> SoCalGas DR 14, Q. 4 d. e.

<sup>97</sup> DRA Workpapers, Module Replacement Costs.xls. Worksheet Batt. Repl. DRA, cells W7:X13 The DRA model uses the module retrofit contact labor rate as a proxy for the loaded in-house labor rate. The 13% differential between the union contract pay grade 5 wage (\$26.16) and the CSF average wage (\$29.60) was applied (scaled up by) the retrofit contract labor rate to estimate the wage differential impact.

#### **SUBCHAPTER 2**

# ALL OCCUPANCIES—MANDATORY REQUIREMENTS FOR THE MANUFACTURE, CONSTRUCTION AND INSTALLATION OF SYSTEMS, EQUIPMENT AND BUILDING COMPONENTS

#### SECTION 110 SYSTEMS AND EQUIPMENT—GENERAL

Sections 111 through 119 establish requirements for the manufacture, construction and installation of certain systems, equipment and building components that are installed in buildings regulated by Title 24, Part 6. Systems, equipment and building components listed below may be installed only if:

- (a) The manufacturer has certified that the system, equipment or building component complies with the applicable manufacture provisions of Sections 111 through 119; and
- (b) The system, equipment or building component complies with the applicable installation provisions of Sections 111 through 119.

No system, equipment or building component covered by the provisions of Sections 111 through 119 that is not certified or that fails to comply with the applicable installation requirements may be installed in a building regulated by Title 24, Part 6.

The systems, equipment and building components covered are:

Appliances regulated by the Appliance Efficiency Regulations (Section 111).

Other space-conditioning equipment (Section 112).

Other service water-heating systems and equipment (Section 113).

Pool and spa heating systems and equipment (Section 114). Gas appliances (Section 115).

Doors, windows and fenestration products (Section 116).

Joints and other openings (Section 117).

Insulation and cool roofs (Section 118).

Lighting control devices (Section 119).

# SECTION 111 MANDATORY REQUIREMENTS FOR APPLIANCES REGULATED BY THE APPLIANCE EFFICIENCY REGULATIONS

Any appliance for which there is a California standard established in the Appliance Efficiency Regulations may be installed only if the manufacturer has certified to the commission, as specified in those regulations, that the appliance complies with the applicable standard for that appliance. See Appendix 1-A for availability of directories of certified appliances.

2007 CALIFORNIA ENERGY CODE

# SECTION 112 MANDATORY REQUIREMENTS FOR SPACE-CONDITIONING EQUIPMENT

**Certification by manufacturers.** Any space-conditioning equipment listed in this section may be installed only if the manufacturer has certified that the equipment complies with all the applicable requirements of this section.

(a) **Efficiency.** Equipment shall meet the applicable requirements of Tables 112-A through 112-M, subject to the following:

- If more than one standard is listed in Tables 112-A through 112-M, the equipment shall meet all the standards listed; and
- If more than one test method is listed in Tables 112-A through 112-M, the equipment shall comply with the applicable standard when tested with each test method; and
- 3. Where equipment can serve more than one function, such as both heating and cooling, or both space heating and water heating, it shall comply with all the requirements applicable to each function; and
- 4. Where a requirement is for equipment rated at its "maximum rated capacity" or "minimum rated capacity," the capacity shall be as provided for and allowed by the controls, during steady-state operation.

Exception to Section 112 (a): Water-cooled centrifugal water-chilling packages that are not designed for operation at ARI Standard 550 test conditions of 44°F leaving chilled water temperature and 85°F entering condenser water temperature shall have a minimum full load COP rating as shown in Tables 112-H, 112-1, and 112-J and a minimum NPLV rating as shown in Tables 112-K, 112-L and 112-M. The table values are only applicable over the following full load design ranges:

Leaving Chiller Water Temperature 40 to 48°F Entering Condenser Water Temperature 75 to 85°F Condensing Water Temperature Rise 5 to 15°F

- (b) Controls for heat pumps with supplementary electric resistance heaters. Heat pumps with supplementary electric resistance heaters shall have controls:
  - 1. That prevent supplementary heater operation when the heating load can be met by the heat pump alone; and
  - In which the cut-on temperature for compression heating is higher than the cut-on temperature for supplementary heating, and the cut-off temperature for compression heating is higher than the cut-off temperature for supplementary heating.

17

#### ALL OCCUPANCIES—MANDATORY REQUIREMENTS

- and water heating, it shall comply with all the requirements applicable to each function; and
- 4. Where a requirement is for equipment rated at its "maximum rated capacity" or "minimum rated capacity," the capacity shall be as provided for and allowed by the controls, during steady-state operation.
- (c) **Installation.** Any service water-heating system or equipment may be installed only if the system or equipment complies with all of the applicable requirements of this subsection for the system or equipment.
  - Outlet temperature controls. On systems that have a total capacity greater than 167,000 Btu/hr, outlets that require higher than service water temperatures as listed in the ASHRAE Handbook, Applications Volume, shall have separate remote heaters, heat exchangers or boosters to supply the outlet with the higher temperature.
  - Pumps for circulating systems. Circulating service water-heating systems shall have a control capable of automatically turning off the circulating pump when hot water is not required.
    - Exception to Section 113(c) 2: Water heating systems serving a single dwelling unit.
  - 3. Temperature controls for public lavatories. The controls shall limit the outlet temperature to 110°F.
  - 4. **Insulation.** Unfired service water heater storage tanks and backup tanks for solar water-heating systems shall have:
    - A. External insulation with an installed *R*-value of at least R-12: or
    - B. Internal and external insulation with a combined *R*-value of at least R-16; or
    - C. The heat loss of the tank surface based on an 80°F water-air temperature difference shall be less than 6.5 Btu per hour per square foot.
  - 5. Service water heaters in state buildings. Any newly constructed building constructed by the State shall derive its service water heating from a system that provides at least 60 percent of the energy needed for service water heating from site solar energy or recovered energy.
    - **Exception to Section 113**(c) **5:** Buildings for which the state architect determines that service water heating from site solar energy or recovered energy is economically or physically infeasible.

# SECTION 114 MANDATORY REQUIREMENTS FOR POOL AND SPA HEATING SYSTEMS AND EQUIPMENT

- (a) **Certification by manufacturers.** Any pool or spa heating system or equipment may be installed only if the manufacturer has certified that the system or equipment has all of the following:
  - Efficiency. A thermal efficiency that complies with the Appliance Efficiency Regulations; and

- On-off switch. A readily accessible on-off switch, mounted on the outside of the heater that allows shutting off the heater without adjusting the thermostat setting; and
- Instructions. A permanent, easily readable and weatherproof plate or card that gives instruction for the
  energy efficient operation of the pool or spa and for the
  proper care of pool or spa water when a cover is used;
  and
- Electric resistance heating. No electric resistance heating; and
  - **Exception 1 to Section 114 (a) 4:** Listed package units with fully insulated enclosures, and with tight-fitting covers that are insulated to at least R-6.
  - **Exception 2 to Section 114 (a) 4:** Pools or spas deriving at least 60 percent of the annual heating energy from site solar energy or recovered energy.
- 5. Pilot light. No pilot light.
- (b) **Installation.** Any pool or spa heating system or equipment shall be installed with all of the following:
  - Piping. At least 36 inches of pipe between the filter and the heater to allow for the future addition of solar heating equipment; and
  - Covers. A cover for outdoor pools or outdoor spas; and Exception to Section 114 (b) 2: Pools or spas deriving at least 60 percent of the annual heating energy from site solar energy or recovered energy.
  - 3. **Directional inlets and time switches for pools.** If the system or equipment is for a pool:

The pool shall have directional inlets that adequately mix the pool water; and

The circulation pump shall have a time switch that allows the pump to be set to run in the off-peak electric demand period, and for the minimum time necessary to maintain the water in the condition required by applicable public health standards.

Exception to Section 114 (b) 3: Where applicable public health standards require on-peak operation.

# SECTION 115 NATURAL GAS CENTRAL FURNACES, COOKING EQUIPMENT, AND POOL AND SPA HEATERS: PILOT LIGHTS PROHIBITED

Any natural gas system or equipment listed below may be installed only if it does not have a continuously burning pilot light:

- (a) Fan-type central furnaces.
- (b) Household cooking appliances.

Exception to Section 115 (b): Household cooking appliances without an electrical supply voltage connection and in which each pilot consumes less than 150 Btu/hr.

- (c) Pool heaters.
- (d) Spa heaters.

Senate Bill No. 183
Lowenthal, Residential Building Safety
Chapter 8. Carbon Monoxide Poisoning Prevention Act of 2010
SEC. 4 Section 17926
Excerpt

Page 1 of 5

BILL NUMBER: SB 183 ENROLLED BILL TEXT

PASSED THE SENATE APRIL 26, 2010

PASSED THE ASSEMBLY APRIL 12, 2010

AMENDED IN ASSEMBLY SEPTEMBER 4, 2009

AMENDED IN ASSEMBLY JUNE 22, 2009

AMENDED IN ASSEMBLY JUNE 11, 2009

AMENDED IN SENATE MAY 26, 2009

AMENDED IN SENATE MAY 6, 2009

AMENDED IN SENATE MAY 6, 2009

INTRODUCED BY Senator Lowenthal
 (Coauthor: Senator Wiggins)
 (Coauthors: Assembly Members Ma and Saldana)

FEBRUARY 17, 2009

An act to amend Sections 1102.6 and 1102.6d of the Civil Code, and to add Sections 17926, 17926.1, and 17926.2 to, and to add Chapter 8 (commencing with Section 13260) to Part 2 of Division 12 of, the Health and Safety Code, relating to residential building safety.

#### LEGISLATIVE COUNSEL'S DIGEST

SB 183, Lowenthal. Residential building safety.

(1) Existing law requires certain transferors of real property improved with 1 to 4 dwelling units, as well as transferors of mobilehomes and manufactured homes, to make specified disclosures to prospective transferees regarding the characteristics of the property and prescribes forms for the purpose of making these disclosures. Existing law requires the transferor of real property containing a single-family dwelling to provide transferees written notice of compliance with specified requirements for the installation of smoke detectors. Existing law requires the seller of any real property containing a water heater to certify in writing to a prospective purchaser compliance with specified safety requirements related to those water heaters.

This bill would revise the disclosure forms, described above, to provide a seller certification that the property, at the close of escrow, will be in compliance with the requirements for smoke detectors and water heaters, described above, and to remove these provisions from elsewhere in the forms. The bill would also revise the disclosure forms to add a disclosure regarding carbon monoxide devices and a statement specifying that installation of a listed appliance, device, or amenity is not a precondition to sale or transfer.

Existing law requires the State Fire Marshal to adopt regulations and standards regarding the quality and installation of burglar bars and safety release mechanisms for emergency escape and rescue windows, the approval and installation of smoke detectors, and the approval of portable fire extinguishers for marketing, distribution, and sale in this state. Existing law requires a smoke detector approved and listed by the State Fire Marshal to be installed in a dwelling unit intended for human occupancy. The State Housing Law creates standards for buildings used for human habitation. A violation of that law is a misdemeanor.

This bill would enact the Carbon Monoxide Poisoning Prevention Act of 2010. This bill would require the State Fire Marshal to certify and approve carbon monoxide devices and their instructions, as specified, for the use in dwelling units intended for human

http://info.sen.ca.gov/pub/09-10/bill/sen/sb 0151-0200/sb 183 bill 20100427 enrolled.html

Page 2 of 5

occupancy, as defined. The bill would require the State Fire Marshal to charge an appropriate fee to the manufacturer of a carbon monoxide device to cover the costs associated with the approval and listing of carbon monoxide devices. The bill would prohibit the marketing, distribution, or sale of devices unless they and their instructions have been approved and listed by the State Fire Marshal. The bill would require a carbon monoxide device to be installed in a dwelling unit intended for human occupancy, as specified, and would generally provide that a violation of these provisions is an infraction punishable by a maximum fine of \$200 for each offense, but the bill would require that a property owner receive a 30-day notice to correct prior to the imposition of the fine. By creating a new crime, this bill would create a state-mandated local program. The bill would provide that a transfer of title is not invalidated on the basis of a failure to comply with these requirements, and that the exclusive remedy for the failure to comply is an award of actual damages not to exceed \$100, exclusive of any court costs and attorney' s fees.

This bill would require an owner or the owner's agent of a dwelling unit intended for human occupancy who rents or leases the dwelling unit to a tenant to maintain carbon monoxide devices in that dwelling unit. The bill would permit the owner or the owner's agent to enter that dwelling unit to install, repair, test, and maintain carbon monoxide devices, as specified. The bill would permit the Department of Housing and Community Development to suspend enforcement of certain requirements on property owners if the department, in consultation with the State Fire Marshal, determines that a sufficient amount of tested and approved carbon monoxide devices are not available, and would require the department to publicize this decision, as specified. The bill would also make a statement of legislative findings.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 1102.6 of the Civil Code is amended to read: 1102.6. The disclosures required by this article pertaining to the property proposed to be transferred are set forth in, and shall be made on a copy of, the following disclosure form:

SEC. 2. Section 1102.6d of the Civil Code is amended to read: 1102.6d. Except for manufactured homes and mobilehomes located in a common interest development governed by Title 6 (commencing with Section 1351), the disclosures applicable to the resale of a manufactured home or mobilehome pursuant to subdivision (b) of Section 1102 are set forth in, and shall be made on a copy of, the following disclosure form:

SEC. 3. Chapter 8 (commencing with Section 13260) is added to Part 2 of Division 12 of the Health and Safety Code, to read:

CHAPTER 8. CARBON MONOXIDE POISONING PREVENTION ACT OF 2010

13260. This chapter shall be known and may be cited as the Carbon Monoxide Poisoning Prevention Act of 2010.

13261. The Legislature finds and declares all of the following: (a) According to the American Medical Association, carbon monoxide is the leading cause of accidental poisoning deaths in the United States. The federal Centers for Disease Control and Prevention estimate that carbon monoxide kills approximately 500 people each

http://info.sen.ca.gov/pub/09-10/bill/sen/sb 0151-0200/sb 183 bill 20100427 enrolled.html

Page 3 of 5

year and injures another 20,000 people nationwide.

- (b) According to the United States Environmental Protection Agency, a person cannot see or smell carbon monoxide. At high levels carbon monoxide can kill a person in minutes. Carbon monoxide is produced whenever any fuel, such as gas, oil, kerosene, wood, or charcoal, is burned.
- (c) The State Air Resources Board estimates that every year carbon monoxide accounts for between 30 and 40 avoidable deaths, possibly thousands of avoidable illnesses, and between 175 and 700 avoidable emergency room and hospital visits.
- (d) There are well-documented chronic health effects of acute carbon monoxide poisoning or prolonged exposure to carbon monoxide, including, but not limited to, lethargy, headaches, concentration problems, amnesia, psychosis, Parkinson's disease, memory impairment, and personality alterations.
- (e) Experts estimate that equipping every home with a carbon monoxide device would cut accident-related costs by 93 percent. Eighteen states and a number of large cities have laws mandating the use of carbon monoxide devices.
- (f) Carbon monoxide devices provide a vital, highly effective, and low-cost protection against carbon monoxide poisoning and these devices should be made available to every home in California.
- (g) The Homeowners' Guide to Environmental Hazards prepared pursuant to Section 10084 of the Business and Professions Code is an important educational tool and should include information regarding carbon monoxide. It is the intent of the Legislature that when the booklet is next updated as existing resources permit, or as private resources are made available, it be updated to include a section on carbon monoxide.
- (a) "Carbon monoxide device" means a device that meets all of the following requirements:
- A device designed to detect carbon monoxide and produce a distinct, audible alarm.
- (2) A device that is battery powered, a plug-in device with battery backup, or a device installed as recommended by Standard 720 of the National Fire Protection Association that is either wired into the alternating current power line of the dwelling unit with a secondary battery backup or connected to a system via a panel.
- (3) If the device is combined with a smoke detector, the combined device shall comply with all of the following:
- (A) The standards that apply to carbon monoxide alarms as described in this chapter.
- (B) The standards that apply to smoke detectors, as described in Section 13113.7.
- (C) The combined device emits an alarm or voice warning in a manner that clearly differentiates between a carbon monoxide alarm warning and a smoke detector warning.
- (4) The device has been tested and certified, pursuant to the requirements of the American National Standards Institute (ANSI) and Underwriters Laboratories Inc. (UL) as set forth in either ANSI/UL 2034 or ANSI/UL 2075, or successor standards, by a nationally recognized testing laboratory listed in the directory of approved testing laboratories established by the Building Materials Listing Program of the Fire Engineering Division of the Office of the State Fire Marshal of the Department of Forestry and Fire Protection.
- (b) "Dwelling unit intended for human occupancy" means a single-family dwelling, factory-built home as defined in Section 19971, duplex, lodging house, dormitory, hotel, motel, condominium, stock cooperative, time-share project, or dwelling unit in a multiple-unit dwelling unit building or buildings. "Dwelling unit intended for human occupancy" does not mean a property owned or leased by the state, the Regents of the University of California, or

http://info.sen.ca.gov/pub/09-10/bill/sen/sb 0151-0200/sb 183 bill 20100427 enrolled.html

Page 4 of 5

- a local governmental agency.
- (c) "Fossil fuel" means coal, kerosene, oil, wood, fuel gases, and other petroleum or hydrocarbon products, which emit carbon monoxide as a byproduct of combustion.
- 13263. (a) (1) The State Fire Marshal shall develop a certification and decertification process to approve and list carbon monoxide devices and to disapprove and delist previously approved devices, if necessary. The certification and decertification process shall include consideration of effectiveness and reliability of the devices, including, but not limited to, their propensity to record false alarms. The certification and decertification process shall include a review of the manufacturer's instructions and shall ensure their consistency with building standards applicable to new construction for the relevant type of occupancy with respect to number and placement.
- (2) The State Fire Marshal shall charge an appropriate fee to the manufacturer of a carbon monoxide device to cover his or her costs associated with the approval and listing of carbon monoxide devices.
- (b) A person shall not market, distribute, offer for sale, or sell any carbon monoxide device in this state unless the device and the instructions have been approved and listed by the State Fire Marshal.
- SEC. 4. Section 17926 is added to the Health and Safety Code, to read:
- 17926. (a) An owner of a dwelling unit intended for human occupancy shall install a carbon monoxide device, approved and listed by the State Fire Marshal pursuant to Section 13263, in each existing dwelling unit having a fossil fuel burning heater or appliance, fireplace, or an attached garage, within the earliest applicable time period as follows:
- (1) For all existing single-family dwelling units intended for human occupancy on or before July 1, 2011.
- (2) For all other existing dwelling units intended for human occupancy on or before January 1, 2013.
- (b) With respect to the number and placement of carbon monoxide devices, an owner shall install the devices in a manner consistent with building standards applicable to new construction for the relevant type of occupancy or with the manufacturer's instructions, if it is technically feasible to do so.
- (c) (1) Notwithstanding Section 17995, and except as provided in paragraph (2), a violation of this section is an infraction punishable by a maximum fine of two hundred dollars (\$200) for each offense.
- (2) Notwithstanding paragraph (1), a property owner shall receive a 30-day notice to correct. If an owner receiving notice fails to correct within that time period, the owner may be assessed the fine pursuant to paragraph (2).
- (d) No transfer of title shall be invalidated on the basis of a failure to comply with this section, and the exclusive remedy for the failure to comply with this section is an award of actual damages not to exceed one hundred dollars (\$100), exclusive of any court costs and attorney's fees. This subdivision is not intended to affect any duties, rights, or remedies otherwise available at law.
- (e) A local ordinance requiring carbon monoxide devices may be enacted or amended if the ordinance is consistent with this chapter. SEC. 5. Section 17926.1 is added to the Health and Safety Code, to read.
- 17926.1. (a) An owner or owner's agent of a dwelling unit intended for human occupancy who rents or leases the dwelling unit to a tenant shall maintain carbon monoxide devices in that dwelling unit consistent with this section and Section 17926.
- (b) An owner or the owner's agent may enter any dwelling unit intended for human occupancy owned by the owner for the purpose of installing, repairing, testing, and maintaining carbon monoxide

 $http://info.sen.ca.gov/pub/09-10/bill/sen/sb\_0151-0200/sb\_183\_bill\_20100427\_enrolled.html$ 

#### SB 183 Senate Bill - ENROLLED

Page 5 of 5

devices required by this section, pursuant to the authority and requirements of Section 1954 of the Civil Code.

- (c) The carbon monoxide device shall be operable at the time that the tenant takes possession. A tenant shall be responsible for notifying the owner or owner's agent if the tenant becomes aware of an inoperable or deficient carbon monoxide device within his or her unit. The owner or owner's agent shall correct any reported deficiencies or inoperabilities in the carbon monoxide device and shall not be in violation of this section for a deficient or inoperable carbon monoxide device when he or she has not received notice of the deficiency or inoperability.
- (d) This section shall not affect any rights which the parties may have under any other provision of law because of the presence or absence of a carbon monoxide device.
- (e) For purposes of this section, with respect to a time-share project, "owner" means the homeowners' association of the time-share project.
- SEC. 6. Section 17926.2 is added to the Health and Safety Code, to read:
- 17926.2. (a) If the department, in consultation with the State Fire Marshal, determines that a sufficient amount of tested and approved carbon monoxide devices are not available to property owners to meet the requirements of the Carbon Monoxide Poisoning Prevention Act of 2009 and Sections 17926 and 17926.1, the department may suspend enforcement of the requirements of Sections 17926 and 17926.1 for up to six months. If the department elects to suspend enforcement of these requirements, the department shall notify the Secretary of State of its decision and shall post a public notice that describes its findings and decision on the departmental Internet Web site.
- (b) If the California Building Standards Commission adopts or updates building standards relating to carbon monoxide devices, the owner or owner's agent, who has installed a carbon monoxide device as required by Section 17926 or 17926.1, shall not be required to install a new device meeting the requirements of those building standards within an individual dwelling unit until the owner makes application for a permit for alterations, repairs, or additions to that dwelling unit, the cost of which will exceed one thousand dollars (\$1,000).
- SEC. 7. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.

Workpaper: 2FO001.000 - Customer Service Dispatch Operations

#### **Activity Description:**

Labor and non-labor costs associated with providing dispatch services for customer service field personnel. Dispatch services include both the routing and dispatching of work to field personnel on a day before and same day basis.

#### Forecast Methodology:

#### Labor - 5-YR Average

The five-year average forecast methodology best represents the level of change of expense that occurs in the dispatch office. This workgroup remains reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

#### Non-Labor - 5-YR Average

The five-year average forecast methodology best represents the level of change of expense that occurs in the dispatch office. This workgroup remains reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

#### NSE - 5-YR Average

NSE is not applicable to this workgroup.

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward

Category: A. Customer Service Field Category-Sub 3. Field Ops-CSF Support

Workpaper: 2FO002.000 - Customer Service Field Supervision

#### **Activity Description:**

Labor and non-labor costs associated with the direct supervision of the customer service field operations workforce.

#### **Forecast Methodology:**

#### Labor - Zero-Based

The customer service field operations supervisor forecast is based on maintaining the current customer service field operations employee to supervisor ratio. The customer service field operations employee forecast and explanation of the applied forecast methodology can be found in workgroup FO000.000.

#### Non-Labor - Zero-Based

The customer service field operations supervisor non-labor is forecast based on the five-year average of historical non-labor expense per supervisor Full-time Equivalent (FTE) multiplied by the forecasted supervisor FTEs.

#### **NSE - Zero-Based**

NSE is not applicable to this workgroup.

#### **Summary of Results:**

Years

Category-Sub 4. Field Ops-CSF Staff

Workpaper: 2FO003.000 - Customer Service Field Management and Staff Support

#### **Activity Description:**

Labor and non-labor costs associated with management, associate, administrative and staff support for the customer service field organiation.

#### Forecast Methodology:

#### Labor - 5-YR Average

The five-year average forecast methodology best represents the level of change of expense that occurs in the customer service management and staff support area. The cost centers in this workgroup primarily perform staff type functions or high level management and are reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

#### Non-Labor - 5-YR Average

The five-year average forecast methodology best represents the level of change of expense that occurs in the customer service management and staff support area. The cost centers in this workgroup primarily perform staff type functions or high level management and are reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

#### NSE - 5-YR Average

NSE is not applicable to this workgroup.

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward

Category: B. Customer Contact Center

Category-Sub 1. Customer Contact Center - Operations

Workpaper: 2CC000.000 - CCC - Operations

#### **Activity Description:**

Labor and non-labor costs associated with the Customer Contact Center (CCC). CCC expenses cover the costs of answering customer telephone calls; responding to incoming email from customers; answering written customer correspondence regarding customer account activity; following up on all California Public Utilities Commission (CPUC) telephone referrals and informal and formal CPUC complaints; and, responding to other customer account related inquiries.

#### Forecast Methodology:

#### Labor - Zero-Based

Due to the various and sometimes volatile nature of the primary business drivers impacting Customer Service Representative (CSR) Full-Time Equivalent (FTE) requirements, including CSR answered calls, level of service, average call handle time, and agent occupancy, a zero based forecast, based on increased call volume and increased average handle time (AHT) and using call center workforce management software, was applied.

#### Non-Labor - Zero-Based

For the CCC Operations non-labor category, a zero based forecast was used by applying the five-year average non-labor cost per FTE and multiplying that times the number of forecasted FTEs. These non-labor expenses primarily consist of travel expense, office supplies, office furniture, and headsets.

#### **NSE - Zero-Based**

NSE is not applicable to this workgroup.

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward

Category: B. Customer Contact Center

Category-Sub 2. Customer Contact Center - Support

Workpaper: 2CC001.000 - CCC - Support

#### **Activity Description:**

Customer Contact Center (CCC) Support cost center activities include resource planning and scheduling, technology support, training, quality assurance, policy and procedures support, planning and analysis functions and clerical functions.

#### Forecast Methodology:

#### Labor - 5-YR Average

The CCC Support cost center workgroup's TY 2012 estimated labor expenses are based on the five-year average of adjusted recorded expenses. Using a five-year average captures the high and low expenditures seen over an extended period of time. The five-year average forecast is adjusted for known changes in the organization that are not reflected in the historical average.

#### Non-Labor - 5-YR Average

The CCC Support cost center workgroup's TY 2012 estimated non-labor expenses are based on the five-year average of adjusted recorded expenses. Using a five-year average captures the high and low expenditures seen over an extended period of time. The five-year average is adjusted for known changes to communications and software and hardware maintenance expenses.

#### NSE - 5-YR Average

NSE is not applicable to this workgroup.

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward

Category: C. Branch Offices & Authorized Payment Locations
Category-Sub 1. Branch Offices & Authorized Payment Locations

Workpaper: 2BO000.000 - Branch Office and Authorized Pay Location Operations

#### **Activity Description:**

Labor and non-labor costs associated with Branch Office and Authorized Pay Location expenses, covering the cost of providing payment collection and other services to those customers who deal in-person for payments, service requests and information.

#### Forecast Methodology:

#### Labor - 5-YR Average

Work volumes in the Branch Offices are driven by fluctuations in "in-person" customer payments, service establishment and service order requests. It is logical to project the base future expenses by using a five-year historical average to encompass the fluctuations in work flow volumes over a reasonable timeframe.

#### Non-Labor - 5-YR Average

Work volumes in the Branch Offices are driven by fluctuations in "in-person" customer payments, service establishment and service order requests. It is logical to project the base future expenses by using a five-year historical average to encompass the fluctuations in work flow volumes over a reasonable timeframe.

#### **NSE - 5-YR Average**

NSE is not applicable to this workgroup.

Identity Theft Red Flags and Address Discrepancies Under the Fair and Accurate Credit Transactions Act of 2003

AGENCIES: Office of the Comptroller of the Currency, Treasury (OCC); Board of Governors of the Federal Reserve System (Board); Federal Deposit Insurance Corporation (FDIC); Office of Thrift Supervision, Treasury (OTS); National Credit Union Administration (NCUA); and Federal Trade Commission (FTC or Commission).

ACTION: Joint final rules and guidelines.

SUMMARY: The OCC, Board, FDIC, OTS, NCUA and FTC (the Agencies) are jointly issuing final rules and guidelines implementing section 114 of the Fair and Accurate Credit Transactions Act of 2003 (FACT Act) and final rules implementing section 315 of the FACT Act. The rules implementing section 114 require each financial institution or creditor to develop and implement a written Identity Theft Prevention Program (Program) to detect, prevent,

and mitigate identity theft in connection with the opening of certain accounts or certain existing accounts. In addition, the Agencies are issuing guidelines to assist financial institutions and creditors in the formulation and maintenance of a Program that satisfies the requirements of the rules. The rules implementing section 114 also require credit and debit card issuers to assess the validity of notifications of changes of address under certain circumstances. Additionally, the Agencies are issuing joint rules under section 315 that provide guidance regarding reasonable policies and procedures that a user of consumer reports must employ when a consumer reporting agency sends the user a notice of address discrepancy.

**DATES:** The joint final rules and guidelines are effective January 1, 2008. The mandatory compliance date for this rule is November 1, 2008.

#### FOR FURTHER INFORMATION CONTACT:

OCC: Amy Friend, Assistant Chief Counsel, (202) 874–5200; Deborah Katz, Senior Counsel, or Andra Shuster, Special Counsel, Legislative and Regulatory Activities Division, (202) 874–5090; Paul Utterback, Compliance Specialist, Compliance Department, (202) 874–5461; or Aida Plaza Carter, Director, Bank Information Technology, (202) 874–4740, Office of the Comptroller of the Currency, 250 E Street, SW., Washington, DC 20219.

Board: David A. Stein or Ky Tran-Trong, Counsels, or Amy Burke, Attorney, Division of Consumer and Community Affairs, (202) 452–3667; Kara L. Handzlik, Attorney, Legal Division, (202) 452–3852; or John Gibbons, Supervisory Financial Analyst, Division of Banking Supervision and Regulation, (202) 452–6409, Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551.

FDIC: Jeffrey M. Kopchik, Senior Policy Analyst, (202) 898–3872, or David P. Lafleur, Policy Analyst, (202) 898–6569, Division of Supervision and Consumer Protection; Richard M. Schwartz, Counsel, (202) 898–7424, or Richard B. Foley, Counsel, (202) 898–3784, Legal Division, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

OTS: Ekita Mitchell, Consumer Regulations Analyst, Compliance and Consumer Protection, (202) 906–6451; Kathleen M. McNulty, Technology Program Manager, Information Technology Risk Management, (202) 906–6322; or Richard Bennett, Senior Compliance Counsel, Regulations and Legislation Division, (202) 906–7409, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

NCUA: Regina M. Metz, Staff Attorney, Office of General Counsel, (703) 518–6540, National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314–3428.

FTC: Naomi B. Lefkovitz, Attorney, or Pavneet Singh, Attorney, Division of Privacy and Identity Protection, Bureau of Consumer Protection, (202) 326— 2252, Federal Trade Commission, 600 Pennsylvania Avenue, NW., Washington DC 20580.

#### SUPPLEMENTARY INFORMATION:

#### I. Introduction

The President signed the FACT Act into law on December 4, 2003.1 The FACT Act added several new provisions to the Fair Credit Reporting Act of 1970 (FCRA), 15 U.S.C. 1681 et seq. Section 114 of the FACT Act, 15 U.S.C. 1681m(e), amends section 615 of the FCRA, and directs the Agencies to issue joint regulations and guidelines regarding the detection, prevention, and mitigation of identity theft, including special regulations requiring debit and credit card issuers to validate notifications of changes of address under certain circumstances.2 Section 315 of the FACT Act, 15 U.S.C 1681c(h), adds a new section 605(h)(2) to the FCRA requiring the Agencies to issue joint regulations that provide guidance regarding reasonable policies and procedures that a user of a consumer report should employ when the user receives a notice of address discrepancy.

On July 18, 2006, the Agencies published a joint notice of proposed rulemaking (NPRM) in the **Federal** Register (71 FR 40786) proposing rules and guidelines to implement section 114 and proposing rules to implement section 315 of the FACT Act. The public comment period closed on September 18, 2006. The Agencies collectively received a total of 129 comments in response to the NPRM, although many commenters sent copies of the same letter to each of the Agencies. The comments included 63 from financial institutions, 12 from financial institution holding companies, 23 from financial institution trade associations. 12 from individuals, nine from other trade associations, five from other business entities, three from consumer

¹ Pub. L. 108–159.

<sup>&</sup>lt;sup>2</sup> Section 111 of the FACT Act defines "identity theft" as "a fraud committed using the identifying information of another person, subject to such further definition as the [Federal Trade] Commission may prescribe, by regulation." 15 U.S.C. 1681a(q)(3).

groups,3 one from a member of Congress, and one from the United States Small Business Administration (SBA).

#### II. Section 114 of the FACT Act

A. Red Flag Regulations and Guidelines

#### 1. Background

Section 114 of the FACT Act requires the Agencies to jointly issue guidelines for financial institutions and creditors regarding identity theft with respect to their account holders and customers. Section 114 also directs the Agencies to prescribe joint regulations requiring each financial institution and creditor to establish reasonable policies and procedures for implementing the guidelines, to identify possible risks to account holders or customers or to the safety and soundness of the institution or "customer."  $^{4}\,$ 

In developing the guidelines, the Agencies must identify patterns, practices, and specific forms of activity that indicate the possible existence of identity theft. The guidelines must be updated as often as necessary, and cannot be inconsistent with the policies and procedures issued under section 326 of the USA PATRIOT Act,5 31 U.S.C. 5318(l), that require verification of the identity of persons opening new accounts. The Agencies also must consider including reasonable guidelines that would apply when a transaction occurs in connection with a consumer's credit or deposit account that has been inactive for two years. These guidelines would provide that in such circumstances, a financial institution or creditor "shall follow reasonable policies and procedures" for notifying the consumer, "in a manner reasonably designed to reduce the likelihood of identity theft.'

#### 2. Overview of Proposal and Comments Received

The Agencies proposed to implement section 114 through regulations requiring each financial institution and creditor to implement a written Program to detect, prevent and mitigate identity theft in connection with the opening of an account or any existing account. The Agencies also proposed guidelines that identified 31 patterns, practices, and specific forms of activity that indicate a possible risk of identity theft. The proposed regulations required each financial institution and creditor to incorporate into its Program relevant

indicators of a possible risk of identity theft (Red Flags), including indicators from among those listed in the guidelines. To promote flexibility and responsiveness to the changing nature of identity theft, the proposed rules also stated that covered entities would need to include in their Programs relevant Red Flags from applicable supervisory guidance, their own experiences, and methods that the entity had identified that reflect changes in identity theft risks.

The Agencies invited comment on all aspects of the proposed regulations and guidelines implementing section 114, and specifically requested comment on whether the elements described in section 114 had been properly allocated between the proposed regulations and the proposed guidelines.

Consumer groups maintained that the proposed regulations provided too much discretion to financial institutions and creditors to decide which accounts and Red Flags to include in their Programs and how to respond to those Red Flags. These commenters stated that the flexible and risk-based approach taken in the proposed rulemaking

would permit "business as usual."
Some small financial institutions also expressed concern about the flexibility afforded by the proposal. These commenters stated that they preferred to have clearer, more structured guidance describing exactly how to develop and implement a Program and what they would need to do to achieve compliance.

Most commenters, however, including many financial institutions and creditors, asserted that the proposal was overly prescriptive, contained requirements beyond those mandated in the FACT Act, would be costly and burdensome to implement, and would complicate the existing efforts of financial institutions and creditors to detect and prevent identity theft. Some industry commenters asserted that the rulemaking was unnecessary because large businesses, such as banks and telecommunications companies, already are motivated to prevent identity theft and other forms of fraud in order to limit their own financial losses. Financial institution commenters maintained that they are already doing most of what would be required by the proposal as a result of having to comply with the customer identification program (CIP) regulations implementing section 326 of the USA PATRIOT Act 6 and other existing requirements. These

commenters suggested that the regulations and guidelines take the form of broad objectives modeled on the objectives set forth in the "Interagency **Guidelines Establishing Information** Security Standards" (Information Security Standards).7 A few financial institution commenters asserted that the primary cause of identity theft is the lack of care on the part of the consumer. They stated that consumers should be held responsible for protecting their own identifying information.

The Agencies have modified the proposed rules and guidelines in light of the comments received. An overview of the final rules, guidelines, and supplement, a discussion of the comments, and the specific manner in which the proposed rules and guidelines have been modified, follows.

#### 3. Overview of final rules and guidelines

The Agencies are issuing final rules and guidelines that provide both flexibility and more guidance to financial institutions and creditors. The final rules also require the Program to address accounts where identity theft is most likely to occur. The final rules describe which financial institutions and creditors are required to have a Program, the objectives of the Program, the elements that the Program must contain, and how the Program must be administered.

Under the final rules, only those financial institutions and creditors that offer or maintain "covered accounts" must develop and implement a written Program. A covered account is (1) an account primarily for personal, family, or household purposes, that involves or is designed to permit multiple payments or transactions, or (2) any other account for which there is a reasonably foreseeable risk to customers or the safety and soundness of the financial institution or creditor from identity theft. Each financial institution and creditor must periodically determine whether it offers or maintains a 'covered account.'

The final regulations provide that the Program must be designed to detect, prevent, and mitigate identity theft in connection with the opening of a covered account or any existing covered account. In addition, the Program must be tailored to the entity's size, complexity and nature of its operations.

<sup>&</sup>lt;sup>3</sup> One of these letters represented the comments

of five consumer groups.

4 Use of the term "customer," here, appears to be a drafting error and likely should read "creditor." <sup>5</sup> Pub. L. 107–56.

<sup>&</sup>lt;sup>6</sup> See, e.g., 31 CFR 103.121 (applicable to banks, thrifts and credit unions and certain non-federally regulated banks).

<sup>712</sup> CFR part 30, app. B (national banks); 12 CFR part 208, app. D–2 and part 225, app. F (state member banks and holding companies); 12 CFR part 364, app. B (state non-member banks); 12 CFR part 570, app. B (savings associations); 12 CFR part 570, app. B (savings associ 748, App. A (credit unions).

phone account, utility account, checking account, or savings account;

- (ii) Any other account that the financial institution or creditor offers or maintains for which there is a reasonably foreseeable risk to customers or to the safety and soundness of the financial institution or creditor from identity theft, including financial, operational, compliance, reputation, or litigation risks.
- (4) *Credit* has the same meaning as in 15 U.S.C. 1681a(r)(5).
- (5) Creditor has the same meaning as in 15 U.S.C. 1681a(r)(5), and includes lenders such as banks, finance companies, automobile dealers, mortgage brokers, utility companies, and telecommunications companies.
- (6) Customer means a person that has a covered account with a financial institution or creditor.
- (7) Financial institution has the same meaning as in 15 U.S.C. 1681a(t).
- (8) *Identity theft* has the same meaning as in 16 CFR 603.2(a).
- (9) Red Flag means a pattern, practice, or specific activity that indicates the possible existence of identity theft.
- (10) Service provider means a person that provides a service directly to the financial institution or creditor.
- (c) Periodic Identification of Covered Accounts. Each financial institution or creditor must periodically determine whether it offers or maintains covered accounts. As a part of this determination, a financial institution or creditor must conduct a risk assessment to determine whether it offers or maintains covered accounts described in paragraph (b)(3)(ii) of this section, taking into consideration:
- (1)  $\check{}$  The methods it provides to open its accounts;
- (2) The methods it provides to access its accounts; and
- (3) Its previous experiences with identity theft.
- (d) Establishment of an Identity Theft Prevention Program. (1) Program requirement. Each financial institution or creditor that offers or maintains one or more covered accounts must develop and implement a written Identity Theft Prevention Program (Program) that is designed to detect, prevent, and mitigate identity theft in connection with the opening of a covered account or any existing covered account. The Program must be appropriate to the size and complexity of the financial institution or creditor and the nature and scope of its activities.
- (2) Elements of the Program. The Program must include reasonable policies and procedures to:

- (i) Identify relevant Red Flags for the covered accounts that the financial institution or creditor offers or maintains, and incorporate those Red Flags into its Program;
- (ii) Detect Red Flags that have been incorporated into the Program of the financial institution or creditor;
- (iii) Respond appropriately to any Red Flags that are detected pursuant to paragraph (d)(2)(ii) of this section to prevent and mitigate identity theft; and
- (iv) Ensure the Program (including the Red Flags determined to be relevant) is updated periodically, to reflect changes in risks to customers and to the safety and soundness of the financial institution or creditor from identity theft.
- (e) Administration of the Program. Each financial institution or creditor that is required to implement a Program must provide for the continued administration of the Program and must:
- (1) Obtain approval of the initial written Program from either its board of directors or an appropriate committee of the board of directors;
- (2) Involve the board of directors, an appropriate committee thereof, or a designated employee at the level of senior management in the oversight, development, implementation and administration of the Program;
- (3) Train staff, as necessary, to effectively implement the Program; and
- (4) Exercise appropriate and effective oversight of service provider arrangements.
- (f) Guidelines. Each financial institution or creditor that is required to implement a Program must consider the guidelines in Appendix J of this part and include in its Program those guidelines that are appropriate.

# § 41.91 Duties of card issuers regarding changes of address.

- (a) Scope. This section applies to an issuer of a debit or credit card (card issuer) that is a national bank, Federal branch or agency of a foreign bank, and any of their operating subsidiaries that are not functionally regulated within the meaning of section 5(c)(5) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844(c)(5)).
- (b) *Definitions*. For purposes of this section:
- (1) Cardholder means a consumer who has been issued a credit or debit card
- (2) Clear and conspicuous means reasonably understandable and designed to call attention to the nature and significance of the information presented.
- (c) Address validation requirements. A card issuer must establish and

- implement reasonable policies and procedures to assess the validity of a change of address if it receives notification of a change of address for a consumer's debit or credit card account and, within a short period of time afterwards (during at least the first 30 days after it receives such notification), the card issuer receives a request for an additional or replacement card for the same account. Under these circumstances, the card issuer may not issue an additional or replacement card, until, in accordance with its reasonable policies and procedures and for the purpose of assessing the validity of the change of address, the card issuer:
- (1)(i) Notifies the cardholder of the request:
- (A) At the cardholder's former address; or
- (B) By any other means of communication that the card issuer and the cardholder have previously agreed to use; and
- (ii) Provides to the cardholder a reasonable means of promptly reporting incorrect address changes; or
- (2) Otherwise assesses the validity of the change of address in accordance with the policies and procedures the card issuer has established pursuant to § 41.90 of this part.
- (d) Alternative timing of address validation. A card issuer may satisfy the requirements of paragraph (c) of this section if it validates an address pursuant to the methods in paragraph (c)(1) or (c)(2) of this section when it receives an address change notification, before it receives a request for an additional or replacement card.
- (e) Form of notice. Any written or electronic notice that the card issuer provides under this paragraph must be clear and conspicuous and provided separately from its regular correspondence with the cardholder.

#### Appendices D-I [Reserved]

- $\blacksquare$  7. Add and reserve appendices D through I to part 41.
- 8. Add Appendix J to part 41 to read as follows:

#### Appendix J to Part 41—Interagency Guidelines on Identity Theft Detection, Prevention, and Mitigation

Section 41.90 of this part requires each financial institution and creditor that offers or maintains one or more covered accounts, as defined in § 41.90(b)(3) of this part, to develop and provide for the continued administration of a written Program to detect, prevent, and mitigate identity theft in connection with the opening of a covered account or any existing covered account. These guidelines are intended to assist financial institutions and creditors in the

formulation and maintenance of a Program that satisfies the requirements of § 41.90 of this part.

#### I. The Program

In designing its Program, a financial institution or creditor may incorporate, as appropriate, its existing policies, procedures, and other arrangements that control reasonably foreseeable risks to customers or to the safety and soundness of the financial institution or creditor from identity theft.

#### II. Identifying Relevant Red Flags

- (a) Risk Factors. A financial institution or creditor should consider the following factors in identifying relevant Red Flags for covered accounts, as appropriate:

  (1) The types of covered accounts it offers
- (1) The types of covered accounts it offers or maintains;
- (2) The methods it provides to open its covered accounts;
- (3) The methods it provides to access its covered accounts; and
- (4) Its previous experiences with identity theft.
- (b) Sources of Red Flags. Financial institutions and creditors should incorporate relevant Red Flags from sources such as:
- (1) Incidents of identity theft that the financial institution or creditor has experienced;
- (2) Methods of identity theft that the financial institution or creditor has identified that reflect changes in identity theft risks;
- (3) Applicable supervisory guidance. (c) Categories of Red Flags. The Program
- (c) Categories of Red Flags. The Program should include relevant Red Flags from the following categories, as appropriate. Examples of Red Flags from each of these categories are appended as Supplement A to this Appendix J.
- this Appendix J.

  (1) Alerts, notifications, or other warnings received from consumer reporting agencies or service providers, such as fraud detection
- (2) The presentation of suspicious documents;
- (3) The presentation of suspicious personal identifying information, such as a suspicious address change;
- (4) The unusual use of, or other suspicious activity related to, a covered account; and
- (5) Notice from customers, victims of identity theft, law enforcement authorities, or other persons regarding possible identity theft in connection with covered accounts held by the financial institution or creditor. III. Detecting Red Flags

The Program's policies and procedures should address the detection of Red Flags in connection with the opening of covered accounts and existing covered accounts, such as by:

- (a) Obtaining identifying information about, and verifying the identity of, a person opening a covered account, for example, using the policies and procedures regarding identification and verification set forth in the Customer Identification Program rules implementing 31 U.S.C. 5318(l) (31 CFR 103.121); and
- (b) Authenticating customers, monitoring transactions, and verifying the validity of change of address requests, in the case of existing covered accounts.

IV. Preventing and Mitigating Identity Theft

The Program's policies and procedures should provide for appropriate responses to the Red Flags the financial institution or creditor has detected that are commensurate with the degree of risk posed. In determining an appropriate response, a financial institution or creditor should consider aggravating factors that may heighten the risk of identity theft, such as a data security incident that results in unauthorized access to a customer's account records held by the financial institution, creditor, or third party, or notice that a customer has provided information related to a covered account held by the financial institution or creditor to someone fraudulently claiming to represent the financial institution or creditor or to a fraudulent website. Appropriate responses may include the following:

- (a) Monitoring a covered account for evidence of identity theft;
  - (b) Contacting the customer;
- (c) Changing any passwords, security codes, or other security devices that permit access to a covered account;
- (d) Reopening a covered account with a new account number;
  - (e) Not opening a new covered account;
- (f) Closing an existing covered account; (g) Not attempting to collect on a covered account or not selling a covered account to a debt collector;
  - (h) Notifying law enforcement; or
- (i) Determining that no response is warranted under the particular circumstances.

#### V. Updating the Program

Financial institutions and creditors should update the Program (including the Red Flags determined to be relevant) periodically, to reflect changes in risks to customers or to the safety and soundness of the financial institution or creditor from identity theft, based on factors such as:

- (a) The experiences of the financial institution or creditor with identity theft;
- (b) Changes in methods of identity theft; (c) Changes in methods to detect, prevent, and mitigate identity theft;
- (d) Changes in the types of accounts that the financial institution or creditor offers or maintains; and
- (e) Changes in the business arrangements of the financial institution or creditor, including mergers, acquisitions, alliances, joint ventures, and service provider arrangements.
- VI. Methods for Administering the Program
- (a) Oversight of Program. Oversight by the board of directors, an appropriate committee of the board, or a designated employee at the level of senior management should include:
- level of senior management should include:
  (1) Assigning specific responsibility for the Program's implementation;
- (2) Reviewing reports prepared by staff regarding compliance by the financial institution or creditor with § 41.90 of this part; and
- (3) Approving material changes to the Program as necessary to address changing identity theft risks.
- (b) *Reports.* (1) *In general.* Staff of the financial institution or creditor responsible for development, implementation, and

administration of its Program should report to the board of directors, an appropriate committee of the board, or a designated employee at the level of senior management, at least annually, on compliance by the financial institution or creditor with § 41.90 of this part.

- (2) Contents of report. The report should address material matters related to the Program and evaluate issues such as: the effectiveness of the policies and procedures of the financial institution or creditor in addressing the risk of identity theft in connection with the opening of covered accounts and with respect to existing covered accounts; service provider arrangements; significant incidents involving identity theft and management's response; and recommendations for material changes to the Program.
- (c) Oversight of service provider arrangements. Whenever a financial institution or creditor engages a service provider to perform an activity in connection with one or more covered accounts the financial institution or creditor should take steps to ensure that the activity of the service provider is conducted in accordance with reasonable policies and procedures designed to detect, prevent, and mitigate the risk of identity theft. For example, a financial institution or creditor could require the service provider by contract to have policies and procedures to detect relevant Red Flags that may arise in the performance of the service provider's activities, and either report the Red Flags to the financial institution or creditor, or to take appropriate steps to prevent or mitigate identity theft.

#### VII. Other Applicable Legal Requirements

Financial institutions and creditors should be mindful of other related legal requirements that may be applicable, such as:

- (a) For financial institutions and creditors that are subject to 31 U.S.C. 5318(g), filing a Suspicious Activity Report in accordance with applicable law and regulation;
- (b) Implementing any requirements under 15 U.S.C. 1681c-1(h) regarding the circumstances under which credit may be extended when the financial institution or creditor detects a fraud or active duty alert;
- (c) Implementing any requirements for furnishers of information to consumer reporting agencies under 15 U.S.C. 1681s–2, for example, to correct or update inaccurate or incomplete information, and to not report information that the furnisher has reasonable cause to believe is inaccurate; and
- (d) Complying with the prohibitions in 15 U.S.C. 1681m on the sale, transfer, and placement for collection of certain debts resulting from identity theft.

#### Supplement A to Appendix J

In addition to incorporating Red Flags from the sources recommended in section II.b. of the Guidelines in Appendix J of this part, each financial institution or creditor may consider incorporating into its Program, whether singly or in combination, Red Flags from the following illustrative examples in connection with covered accounts:

#### Federal Register/Vol. 72, No. 217/Friday, November 9, 2007/Rules and Regulations

Alerts, Notifications or Warnings from a Consumer Reporting Agency

63756

- 1. A fraud or active duty alert is included with a consumer report.
- 2. A consumer reporting agency provides a notice of credit freeze in response to a request for a consumer report.
- 3. A consumer reporting agency provides a notice of address discrepancy, as defined in  $\S\,41.82(b)$  of this part.
- 4. A consumer report indicates a pattern of activity that is inconsistent with the history and usual pattern of activity of an applicant or customer, such as:
- a. A recent and significant increase in the volume of inquiries;
- b. An unusual number of recently
- established credit relationships; c. A material change in the use of credit, especially with respect to recently established credit relationships; or d. An account that was closed for cause or
- identified for abuse of account privileges by a financial institution or creditor.

#### Suspicious Documents

- 5. Documents provided for identification appear to have been altered or forged.
- 6. The photograph or physical description on the identification is not consistent with the appearance of the applicant or customer presenting the identification.
- 7. Other information on the identification is not consistent with information provided by the person opening a new covered account or customer presenting the identification.
- 8. Other information on the identification is not consistent with readily accessible information that is on file with the financial institution or creditor, such as a signature card or a recent check.
- 9. An application appears to have been altered or forged, or gives the appearance of having been destroyed and reassembled.

#### Suspicious Personal Identifying Information

- 10. Personal identifying information provided is inconsistent when compared against external information sources used by the financial institution or creditor. For example:
- a. The address does not match any address in the consumer report; or
- b. The Social Security Number (SSN) has not been issued, or is listed on the Social Security Administration's Death Master File.
- 11. Personal identifying information provided by the customer is not consistent with other personal identifying information provided by the customer. For example, there is a lack of correlation between the SSN range and date of birth. 12. Personal identifying information
- provided is associated with known fraudulent activity as indicated by internal or third-party sources used by the financial institution or creditor. For example:
- a. The address on an application is the same as the address provided on a fraudulent application; or
- b. The phone number on an application is the same as the number provided on a fraudulent application.
- 13. Personal identifying information provided is of a type commonly associated with fraudulent activity as indicated by

- internal or third-party sources used by the financial institution or creditor. For example:
- a. The address on an application is fictitious, a mail drop, or a prison; or b. The phone number is invalid, or is
- associated with a pager or answering service.
- 14. The SSN provided is the same as that submitted by other persons opening an account or other customers.

  15. The address or telephone number
- provided is the same as or similar to the account number or telephone number submitted by an unusually large number of other persons opening accounts or other
- 16. The person opening the covered account or the customer fails to provide all required personal identifying information on an application or in response to notification that the application is incomplete.
- 17. Personal identifying information provided is not consistent with personal identifying information that is on file with the financial institution or creditor.
- 18. For financial institutions and creditors that use challenge questions, the person opening the covered account or the customer cannot provide authenticating information beyond that which generally would be available from a wallet or consumer report.

Unusual Use of, or Suspicious Activity Related to, the Covered Account

- 19. Shortly following the notice of a change of address for a covered account, the institution or creditor receives a request for a new, additional, or replacement card or a cell phone, or for the addition of authorized users on the account.
- 20. A new revolving credit account is used in a manner commonly associated with known patterns of fraud patterns. For example:
- a. The majority of available credit is used for cash advances or merchandise that is easily convertible to cash (e.g., electronics equipment or jewelry); or
- b. The customer fails to make the first payment or makes an initial payment but no subsequent payments.
- 21. A covered account is used in a manner that is not consistent with established patterns of activity on the account. There is, for example:
- a. Nonpayment when there is no history of late or missed payments;
  b. A material increase in the use of
- available credit:
- c. A material change in purchasing or spending patterns;
- d. A material change in electronic fund transfer patterns in connection with a deposit account; or
- e. A material change in telephone call patterns in connection with a cellular phone account.
- 22. A covered account that has been inactive for a reasonably lengthy period of time is used (taking into consideration the type of account, the expected pattern of usage and other relevant factors).
- 23. Mail sent to the customer is returned repeatedly as undeliverable although transactions continue to be conducted in connection with the customer's covered

- 24. The financial institution or creditor is notified that the customer is not receiving paper account statements.
- 25. The financial institution or creditor is notified of unauthorized charges or transactions in connection with a customer's covered account.

Notice From Customers, Victims of Identity Theft, Law Enforcement Authorities, or Other Persons Regarding Possible Identity Theft in Connection With Covered Accounts Held by the Financial Institution or Creditor

26. The financial institution or creditor is notified by a customer, a victim of identity theft, a law enforcement authority, or any other person that it has opened a fraudulent account for a person engaged in identity

#### **Board of Governors of the Federal** Reserve System

12 CFR Chapter II.

#### **Authority and Issuance**

■ For the reasons set forth in the joint preamble, part 222 of title 12, chapter II, of the Code of Federal Regulations is amended as follows:

#### PART 222—FAIR CREDIT REPORTING (REGULATION V)

■ 1. The authority citation for part 222 continues to read as follows:

Authority: 15 U.S.C. 1681a, 1681b, 1681c, 1681m, 1681s, 1681s-2, 1681s-3, 1681t, and 1681w; Secs. 3 and 214, Pub. L. 108-159, 117

#### Subpart A—General Provisions

■ 2. Section 222.3 is amended by revising the introductory text to read as follows:

#### § 222.3 Definitions.

For purposes of this part, unless explicitly stated otherwise:

lacksquare 3. The heading for Subpart I is revised to read as follows:

#### Subpart I—Duties of Users of Consumer Reports Regarding Address Discrepancies and Records Disposal

■ 4. A new § 222.82 is added to read as follows:

#### § 222.82 Duties of users regarding address discrepancies.

(a) Scope. This section applies to a user of consumer reports (user) that receives a notice of address discrepancy from a consumer reporting agency, and that is a member bank of the Federal Reserve System (other than a national bank) and its respective operating subsidiaries, a branch or agency of a foreign bank (other than a Federal branch, Federal agency, or insured State branch of a foreign bank), commercial

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward Category: D. Meter Reading

Category-Sub 1. Field Ops-MRdg-Dist Opers

Workpaper: 2FO004.000 - Field Ops-MRdg-Dist Opers

#### **Activity Description:**

Meter Reading District Operations covers the cost of recording customer gas consumption to accurately bill customers for the consumption of gas. Meter reading activities are performed at meter reading districts throughout the SCG service territory. Labor expenses include those for both full-time Meter Reading Technicians and Meter Readers and part-time Meter Readers. Non-labor expenses associated to the activities of these employees are also represented in this group.

#### Forecast Methodology:

#### Labor - 5-YR Average

The five-year average methodology captures the high and low expenditures seen under a variety of conditions. It provides the best representative base of labor over the years for all district cost centers before minimal adjustments were made. Significant changes over the last five years are smoothed with this method.

#### Non-Labor - 5-YR Average

The five-year average methodology captures the high and low expenditures seen under a variety of conditions. It provides the best representative base of non-labor over the years for all district cost centers before minimal adjustments were made.

#### NSE - 5-YR Average

NSE is not applicable to this workgroup.

Notes/Calculations:
Part-Time employee reductions by location for the years 2007 -2009. Identifies the amount of months each year the employees were reduced at each base.

a) Hours Reduced (Employees Reduced x Avg. Daily Route Time x Routes per Month)

b) Full-time Equivalent (Hours Reduced / FTE Hours for each year)

b) Full-time Equivalent (Hours Reduced / FTE Hours for each year)

c) Monthly Wetering Dollars (Employees Reduced x Monthly Meeting Time x Blented Wage Rate)

d) Monthly Route Dollars (Employees Reduced x Avg. Daily Route Time x Routes per Month x Blended Wage Rate)

e) Annual Labor Savings (Monthly Route Dollars Honthly Meeting Dollars x Months of Savings)

f) Annual Non-Labor Savings (Annual Non-Labor Dollars per FTE x Full-Time Equivalent)

Beginning of Workpaper 2FO005.000 - Field Ops-MRdg-Clerical Opers

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward Category: D. Meter Reading

Category-Sub 2. Field Ops-MRdg-Clerical Opers

Workpaper: 2FO005.000 - Field Ops-MRdg-Clerical Opers

### **Activity Description:**

Meter Reading Clerical Operations activities performed by non-management meter reading clerks at two locations (Chatsworth and Anaheim). Activities include timekeeping, payroll, scheduling and customer facility record updates.

### **Forecast Methodology:**

### Labor - 5-YR Average

Using a five-year average captures the high and low expenditures seen under a variety of conditions.

### Non-Labor - 5-YR Average

Using a five-year average captures the high and low expenditures seen under a variety of conditions

### NSE - 5-YR Average

NSE is not applicable to this workgroup.

Workpaper: 2FO006.000 - Field Ops-MRdg-Supv/Trng/Prog

### **Activity Description:**

The workgroup represents Meter Reading Supervisors and Meter Reading Field Instructors directly overseeing and training the meter reading operations workforce. Also included in the workgroup are the costs for safety programs.

### **Forecast Methodology:**

### Labor - 5-YR Average

The five-year average best represents the actual staffing variations incurred over the years for supervisors, field instructors and safety programs.

### Non-Labor - 5-YR Average

The five-year average best represents the actual non-labor variations incurred over the years by supervisors, field instructors and safety programs.

### NSE - 5-YR Average

NSE is not applicable to this workgroup.

# PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

COMMISSION ADVISORY AND COMPLIANCE DIVISION Energy Branch

RESOLUTION G-2972 November 20, 1991

### RESQLUTION

RESOLUTION G-2972. SOUTHERN CALIFORNIA GAS COMPANY REQUEST FOR AUTHORITY TO: (1) IMPLEMENT TWO NEW PILOT TEST SERVICE OFFERINGS TO ITS RESIDENTIAL CUSTOMERS, WRAPPING AND STRAPPING OF GAS HOT WATER HEATERS, AND CONNECTING GAS APPLIANCES; (2) CHARGE \$25.00 PER SERVICE CALL WITH A SET-TIME APPOINTMENT OPTION.

BY ADVICE LETTERS NOS. 2078 AND 2079, FILED ON OCTOBER 18, 1991.

#### SUMMARY

- 1. The Southern California Gas Company (SoCal) filed Advice Letters (AL) 2078 and 2079 on October 18, 1991 requesting authority to offer two pilot services to residential customers (1) wrapping and strapping of water heaters and various appliance connections for a fee (AL 2078); (2) offer a set-time appointment service call within one-half hour, plus or minus, of the time requested for \$25.00 per visit (AL 2079).
- This Resolution approves the requests with modifications, and requires SoCal to file tariffs for the services as well as maintain a memorandum account as requested.

#### **BACKGROUND**

# WRAP & STRAP and Appliance Connection (AL 2078)

- 1. AL 2078 was filed by SoCal to promote energy conservation and minimize the possible movement of water heaters during an earthquake. SoCal would install water heater blankets and anchor (strap) 20 to 50 gallon residential water heaters at the following estimated costs:
  - (1) Strapping of hot water heater not anchored to the structure......\$79.00
  - (2) Wrapping of hot water heater where water heater is not insulated to at least an R-6 value.....\$42.00
  - (3) Strapping of water heater and installation of the blanket.....\$93.00

Resolution G-2972 SoCal AL 2078, AL 2079/dog/dug

November 20, 1991

Site specific estimates may vary in cost depending on labor time expended by service representatives and the complexity of the job.

2. Currently, SoCal will connect residential appliances (gas ranges and dryers) at no charge when turning on new service. This service will continue. AL 2078 would provide the connection of gas appliances for existing customer accounts at the following charges:

To connect a gas range or dryer, standard connection, if parts are not needed......\$38.00 Installation and valve.....\$43.00 Installation, connector and valve...\$53.00 Installation for a Bar-B-Que....\$106.00

- SoCal proposes that a written estimate approved by the customer must be executed before any service is rendered.
- 4. Billing for the services rendered under the wrap and strap and appliance connection service offerings is proposed by SoCal to be due and payable upon completion of work. SoCal also proposes that if the customer is unable to pay the fee at the time service is rendered, payment will be made on a deferred payment basis. Customers will be billed and required to remit payment within 30 days. Billings for the wrap and strap and appliance connection service is proposed to be processed separately from the regular gas bill.
- 5. SoCal proposes that net revenues from these service offerings (revenues net of expenses for parts and supplies) should be accounted for separately and held for disposition by the Commission in SoCalGas' next cost allocation proceeding. The experience from this interim program will provide the basis for establishing appropriate revenue credits in conjunction with SoCal's next general rate case.

### APPOINTMENT SERVICE (AL 2079)

- 6. AL 2079 would provide for set-time appointment service calls at \$25.00 per visit. The new policy of offering set-time appointment service calls would provide customers specifically scheduled appointments, upon request, for authorized types of non-emergency service calls. These set-time appointment service calls would be available with the mid-points for expected arrivals on the hour or half-hour (e.g. with an appointment at 12:30, SoCal could arrive between 12:00 and 1:00) Monday through Friday from 8:00 a.m. to 7:00 p.m. for days subsequent to the day when the customer books an appointment. The service would not be available on week-ends and legal holidays.
- 7. The agreed-upon time shall be deemed to have been met and the charge of \$25.00 will be assessed if the representative arrives at the customer's premise within plus or minus 30 minutes (or a one hour span of time) of the agreed-upon time.

Resolution G-2972 SoCal AL 2078, AL 2079/dog/dug

November 20, 1991

- 8. SoCal proposes that the customer will be advised at the time the service call is scheduled that the \$25.00 charge will be collected when service is rendered. If the customer indicates they will be unable to make payment, no work would be performed by SoCal.
- 9. SoCal will continue to offer, at no charge, morning appointments where the representative would arrive at the customer's premise between 7:00 a.m. and noon, and afternoon appointments, where the representative would arrive at the customer's premise between 1:00 p.m. and 5:00 p.m. In addition, for the first time and at no charge, SoCal will offer early evening appointments between the hours of 5:00 p.m. and 8:00 p.m.
- 10. SoCal's service representatives will still offer service between 9:00 a.m. and 1:00 p.m. and 1:00 p.m. to 5:00 p.m. as required by Senate Bill 101. These four hour appointment windows (compared to the new one hour appointment) continue to be offered without charge.
- 11. San Diego Gas & Electric Company (SDG&E) was authorized by Commission Decisions 85-12-108 and 85-12-104 to charge \$60.00 for service established at a specified time during regular workdays. For SDG&E customers, work must begin within 30 minutes (half the interval of SoCal's new appointment) after the time specified in the request. Other energy utilities such as CP National and Southwest Gas Company have tariff provisions similar to SDG&E's.

### NOTICE

1. The advice letters were noticed by publication in the Commission Calendar. Southern California Gas Company also provided direct notice to other parties as required by Commission practices and rules. In addition, SoCal has published notice of the intended service offerings in local newspapers.

#### PROTESTS

- 1. Adee Plumbing & Heating, Inc. protests Advice Letter 2078 by letter dated October 28, 1991. Jack Oal Stephan, President, objects to what he terms unfair competition as exemplified by SoCal's advertisement of its proposed services. Similar protests and informal letters, quite numerous and citing the same essential issue, are listed in Appendix A.
- 2. In response, SoCal asserts that no installations will require permit work, and therefore the service representatives will only install and will do no plumbing. After a review of SoCal's costs, it does not appear it will use an unfair advantage for the wrap and strap and the appliance connection services.
- 3. The Division of Ratepayer Advocates (DRA) protested both advice letters by a letter dated November 7, 1991. DRA believes

Resolution G-2972 SoCal AL 2078, AL 2079/dog/dug

November 20, 1991

there could be potential conservation benefits to the wrap and strap service and that seismic safety benefits exist. It is concerned about the intertwining of this service with Demand Side Management (DSM) programs. SoCal has stated that DSM programs do not include wrap and strap in its territory.

- 4. DRA recommends that for services under Advice Letter 2078, "(1) the Commission authorize the new services on an interim basis with a termination date of December 31, 1993, (2) the revenues generated be returned to ratepayers, and (3) the pilot programs be fully evaluated in the next general rate case."
- 5. DRA recommends the rejection of Advice Letter 2079 stating "(c)ustomers will benefit from the increased flexibility as a result of the expanded service. Although some customers would benefit from the additional flexibility provided by SetTime Appointments, a \$25 fee for SetTime Appointments raises highly controversial equity questions." DRA does not elaborate or describe the equity questions nor does it say why they are controversial. DRA recommends this be in a general rate proceeding where all parties have an opportunity to voice their concerns.
- 6. Toward Utility Rate Normalization (TURN) filed a protest on the \$25 set-time appointment service calls proposed by SoCal in AL 2079. TURN's concern is that the utility will provide a higher quality of service based upon the customer's ability to pay. Historically, service calls provided by SoCal has never been based on cost. The quality of the proposed service has always been the same for all consumers within a given customer class. TURN is concerned that the quality of the existing free service will begin to deteriorate over time if a fee-for-service plan is adopted. TURN does support SoCal's proposal to offer evening appointments with a 5:00 p.m. to 8:00 p.m. time window at this time. This may preempt the need for set-time appointments at a cost of \$25.00. TURN submits that the proposed \$25.00 feet for set-time appointments should be rejected.
- 7. CACD believes the \$25.00 set-time appointment should be accepted because it offers customers an option to the four-hour wait customer's typically endure. The cost of the set-time appointment program will not be borne by residential or non-residential ratepayers, with the charge to the customer offsetting all costs incurred by SoCal. This program is already in place and effective in San Diego Gas & Electric Company and other utilities, and there does not appear to be any reason why it should not be available in SoCal territory as well.

#### DISCUSSION

1. There could be several problems with the proposal by SoCal to collect on the site for these services. Cash transactions may pose a problem by making field representatives more vulnerable to crimes. In its initial response to a request for further information by the Commission Advisory & Compliance

Resolution G-2972 SoCal AL 2078, AL 2079/dog/dug

November 20, 1991

Division (CACD) SoCal indicated that for wrap and strap and appliance installation "customers may pay at the time the service is provided or be billed". But for set-time 60 minute appointments, "the following are reasons for collecting at the time of the field call: (a) To reduce any losses from uncollectible debt; (b) Since this charge is not associated with gas usage our collection leverage is minimal; and (c) The revenue collected under this program will be held in a special account and returned to the CPUC."

- Clearly, SoCal does not have a consistent view on collecting the charges. These should be tariffed services and neither should require payment at the time of service. In the case of set time appointments where customers might later try to deny that they were informed of the charge and dispute their billing, SoCal should instead require that customers sign a release acknowledging responsibility for the charge. CACD sees no significant equity question to delay offering this service now. Customers will have the added choice of evening appointments at no charge in addition to the four hour morning and afternoon appointments. The shorter time appointment is entirely optional and no harm has been suggested by its
- 3. These programs, wrap and strap and appliance connections, and set-time appointment field service call should not result in unfair use of monopoly power over other service providers. The common thread in the formal protests and informal letters to the Commission concerning mainly Advice Letter 2078 is that SoCal will provide services at a lower charge than licensed plumbers. SoCal states the company will perform no service which requires a building permit, inspection or license. CACD believes that as long as SoCal prices its service at or above its full cost then the customers are entitled to the choice of a plumber or SoCal. That is true competition; if SoCal fully covers its costs then there is a benefit to the ratepayer by it offering the service. The Commission should shelter neither the utility nor the
- 4. CACD has no objection to enhanced service with a tariff rate based on recovering the full cost of providing the enhanced services. The fully allocated cost should include the depreciation and return on rate base for fixed assets such as trucks, inventory, and the service dispatch center, etc., to ensure that there is no cross subsidy which would allow SoCal to compete unfairly with other service providers. We have reviewed SoCal's rates for the wrap and strap services compared with four contractors providing water heater strapping services. An evaluation of SoCal's pricing does not reflect monopolistic pricing below the SoCal cost of service with the objective to eliminate competition even though SoCal's costs could be less than the contractors' full charge. The contractors selected were:

Resolution G-2972 SoCal AL 2078, AL 2079/dog/dug

November 20, 1991

	<u>Name</u>	Hourly Rate 1 hour minimum	Trip Charge
1.	Adee Plumbing and Heating	\$45.00	No Trip Charge
2. 3. 4.	Mike Diamond George Brazil Santa Maria Appliance Residential Appliance	\$59.95 \$59.95 \$36.00	No Trip Charge No Trip Charge \$26.00

CACD firmly believes that SoCal should not be granted authority to charge customers based solely upon its representation of estimated charges but that SoCal should be required to charge at fixed rates on file in its tariff books. SoCal could seek subsequent rate changes by advice letter or in its subsequent general rate cases or other application.

- 5. SoCal should prepare proper accounting records and procedures to segregate these new services and accumulate the fully loaded costs for direct time and materials as well as all overhead loadings to record the cost of providing these services. SoCal should also prepare an annual cost study and a detailed report for these programs due on March 1, 1993 and sent to CACD's Energy Branch. SoCal should also report the number of services performed for wrap and strap, and appliance connection as well as the costs of the set-time appointment service in the Annual Report.
- 6. As regulated services, the rates for wrap and strap, appliance connection and set-time appointment service should be filed in SoCal's Tariffs under the authority of General Order 96-A, Section V.
- 7. The service to new order customers at no charge for gas ranges and dryer appliance connections will not be changed. For existing customers, wrap and strap and appliance connections will be offered at the tariffed rates.
- 8. SoCal proposes a memorandum account for the "net revenues" and proposes that the Commission review that account later. CACD recommends that SoCal maintain a full cost of service and revenue memorandum account to ensure the services are never cross-subsidized. The next general rate case seems to be the most appropriate vehicle to review these costs and either incorporate them into base rates or terminate them based upon the record at that time.

#### **FINDINGS**

1. San Diego Gas & Electric Company, by Decision 85-12-108, dated January 1, 1986 was authorized to offer a time-specific appointment of one-half hour within a specified time for residential customers at a charge of \$60.00 per visit. By Commission Decision 85-12-103 dated December 20, 1985, Southwest Gas Corporation was authorized to offer time specific appointments at a cost of \$40.00 to customers.

Resolution G-2972 SoCal AL 2078, AL 2079/dog/dug

November 20, 1991

- 2. CACD believes that as long as SoCal prices the service at or above its cost to provide the service its customers will benefit and there would be no unfair competition. SoCal is also restricting the service to minor connections which do not require permits or licensing.
- 3. Ratepayers will not subsidize these programs. The advice filings indicate that the service charges adopted will not increase any existing rate or charge, conflict with any rule or schedule, or cause the withdrawal or reduction of any existing service.
- 4. This programs will enhance customer service, safety and conservation. Service will be expanded to 8:00 p.m. for non-emergency services. A wrapped gas hot water heater has been shown to be more efficient as well as being safer.
- 5. SoCal has not shown that it is reasonable to demand payment upon service. SoCal should allow customers to sign a release for inclusion of charges for both set-time appointments and the wrap and strap and appliance connections.
- 6. SoCal has not shown that it should only indicate estimated costs but that the services should be offered at fixed tariffs. SoCal may seek rate relief if these rates are not compensatory over time.
- 7. SoCal should maintain a full cost of service and revenue memorandum account with the disposition of the account and the future of these services determined in the next general rate case.

Resolution G-2972 SoCal AL 2078, AL 2079/dog/dug

November 20, 1991

### THEREFORE, IT IS ORDERED that:

- Southern California Gas Company's Advice Letters 2078 and 2079 should be approved as modified.
- 2. Southern California Gas Company should submit a report on March 15, 1993 citing the costs and revenues on a fully allocated cost basis of wrap and strap and appliance connection programs and the set-time appointments.
- 3. Southern California Gas Company shall submit a supplement to both Advice Letters 2078 and 2079 to include tariff sheets and full descriptions for both the wrap and strap and appliance installation program and the set-time appointment service and to allow customers to authorize inclusion of the service charge in their monthly bills.
- 4. Southern California Gas Company shall maintain a memorandum account containing the fully allocated cost of service as well as the revenues for both the wrap and appliance installation services and the set-time appointment services.
- 5. Southern California Gas Company must file the supplemental Advice Letters 2078 and 2079 before it begins to offer these services.
- 6. This Resolution is effective today.

I hereby certify that this Resolution was adopted by the Public Utilities Commission at its regular meeting on November 20, 1991. The following Commissioners approved it:

NEAL J. SHULMAN Executive Director

> PATRICIA M. ECKERT President DANIEL Wm. FESSLER NORMAN D. SHUMWAY Commissioners

Commissioner John B. Ohanian, being necessarily absent, did not participate.

Resolution G-3438

DATE OF ISSUANCE: 01/25/10

#### PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

ENERGY DIVISION

RESOLUTION G-3438 DATE: January 21, 2010

#### RESOLUTION

Resolution G-3438. Southern California Gas Company (SoCalGas) request for approval of revisions to its Rule 10 - Service Charges.

#### **Proposed Outcome:**

SoCalGas proposes to increase the charges for appliance connections and seismic valve services, add charges for some equipment pieces, and revise tariff language related to bill payment for these services.

- 1) SoCalGas' request to revise the fees related to seismic valve services is denied.
- SoCalGas' request to reduce the amount of time that bills are due, if billing is done separately from the monthly gas bill, is denied.
- SoCalGas' request to revise existing tariff language to enable it to terminate service for failure to timely pay for the seismic valve service and other appliance connection charges is denied.
- 4) All other aspects of SoCalGas' request are approved.

Estimated C	ost: \$222,629	)
-------------	----------------	---

By Advice Letter 3995 filed on June 22, 2009.

#### **SUMMARY**

This Resolution partly approves SoCalGas' revisions to its service charges proposed in Advice Letter (AL) 3995 as summarized below:

- 1) SoCalGas' request to increase the charges for appliance connections, which are billed directly to the customers who request such services, is approved.
- SoCalGas' request to expand the list of charges for certain pieces of equipment needed for these services and to charge for gas log installation is also approved.
- 3) SoCalGas' request to increase the fees for seismic valve services is denied. SoCalGas does not have the authority to request increases in fees for seismic valve services by advice letter.
- 4) SoCalGas' request to reduce the amount of time that bills are due, when billing is done separately from the monthly gas service bill, is denied. SoCalGas provided insufficient justification for this reduction.
- 5) SoCalGas' request to revise existing tariff language to enable it to terminate service for failure to timely pay for the seismic valve service and other appliance connection charges is denied.

### **BACKGROUND AND DESCRIPTION OF PROPOSALS**

Resolution G-2972, dated November 20, 1991, approved SoCalGas' request to charge a fee for connecting its customers' gas appliances. Customers have the option to obtain this service from non-utility providers such as plumbers and contractors.

Resolution G-2972 (which addressed appliance connections and set-timed appointments) provided that SoCalGas "...may seek rate relief if these rates are not compensatory over time" and that SoCalGas may request rate relief for these services by an advice letter. SoCalGas submitted AL 3995 as a Tier 3 advice letter under GO 96-B, Energy Industry Rule 5.3.

412801 1

Resolution G-3438 SoCalGas/AL 3995/beg January 21, 2010

In AL 3995, SoCalGas proposes to increase the charges for appliance connections. SoCalGas proposes to increase the charges for these services, add charges for specific pieces of equipment needed to provide these services, and to add a fee for the installation of "gas logs" in fireplaces. SoCalGas claims that these charges reflect the actual cost of providing these services in order to prevent rate subsidization and to provide more flexible options to SoCalGas' customers. SoCalGas states that customer demand compels them to add installation of gas logs to their program.

According to SoCalGas, the proposed increases in these charges are needed to reflect increases in labor, gasoline, administrative costs, modifications of manufacturers' standards, technology advances and more challenging customer needs. SoCalGas states that the charges for appliance connections have not been changed since 1991, when they were first approved.

SoCalGas also proposes to increase the charges for restoring service after a seismic valve activates to reflect increases in costs over the past seven years. The current charges have been in effect since 2002. Decision (D.) 01-11-068 authorized SoCalGas to directly charge customers who request seismic valve services. D.01-11-068 states that the installation, maintenance and removal of the earthquake valve are the responsibility of the owner and not the utility. In addition, the decision affirms that when the earthquake valve shuts off gas for any reason, the restoration of gas service should not be subsidized by the utility's ratepayers. Language in the tariff allows the utility the option to waive the charges for restoration of service after a major earthquake. SoCalGas Rule 10 states the charges for such services.

Customers currently may pay the charge for these services either at the time of service or by separate billing. SoCalGas now proposes to eliminate the option to pay at the time of service. SoCalGas currently gives its customers the option to pay for set-timed appointments, appliance connection charges, or seismic valve service at the time service is rendered or by separate billing. However, SoCalGas states that customers have conveyed to utility employees that a separate bill is the preferred payment option, and that SoCalGas has been unable to collect field payments 65% of the time. In addition, SoCalGas wishes to more clearly separate the billing function from its service function. Finally, SoCalGas claims that there is a safety issue associated with service employees collecting payments once the service has been provided.

SoCalGas proposes to revise the current language of Rule 10.F and G.5 to eliminate the option of bill payment at the time of service completion. Instead, SoCalGas will allow customers the option of having the bill included on their monthly gas bill or being billed separately.

SoCalGas proposes that payment will be due in 20 days if the customer is billed separately, in lieu of the current due date of 30 days. SoCalGas stated that the charges for the set-timed appointment and appliance connection charges are likely to be billed with the bill for gas service. Under paragraph C.1 of Rule Number 9, residential customers who are normally billed monthly have a minimum of 34 calendar days between the date of mailing the bill and the date of service termination for non-payment. Non-residential customers must pay their gas bills within shorter time periods. SoCalGas asserts that this language aligns billing for all customers utilizing these service offerings.

SoCalGas also proposes to delete the current tariff language which states that the gas service will not be terminated for failure to pay for the seismic valve service. SoCalGas proposes to delete the language in Section 10.G.5 of Rule 10 stating "...but will not terminate gas service for failure to pay for any services rendered pursuant to this section." According to SoCalGas , the inability to terminate gas services for failure to pay for Seismic Valve Service places undue burden on other ratepayers which have to absorb any subsequent write-off amounts due to the non-payment by some customers. SoCalGas states that the inability to terminate gas services for failure to timely pay for the seismic valve service equates to subsidization which Resolution G-2972 explicitly prohibited.

Resolution G-3438 SoCalGas/AL 3995/beg January 21, 2010

#### **NOTICE**

Notice of AL 3995 was made by publication in the Commission's Daily Calendar. SoCalGas states that a copy of the Advice Letter was mailed and distributed in accordance with Section 3.14 of General Order 96-B.

#### **PROTESTS**

Advice Letter 3995 was not protested.

#### **DISCUSSION**

SoCalGas' proposed increases in appliance connection charges are necessary to reflect cost increases due to inflation and expansion of its Appliance Connection Program which includes additional appliances and parts installations brought on by modifications of manufacturer's standards, technology advances, and greater customer needs. SoCalGas' charges reflect its costs for the appliance connection and seismic valve services. SoCalGas has not increased these fees since 1991. SoCalGas' addition of gas logs to its program is reasonable. SoCalGas' request to increase appliance connection fees and charge fees for specific pieces of appliance connection equipment is approved.

SoCalGas is not the sole provider of the appliance connection services for which the increases in charges are requested in this advice letter. Customers can obtain these services from other providers as well. Appliance connections and gas log installations are services which customers can obtain from other competitive sources, if they so desire. SoCalGas is not the monopoly provider of these services. The current and proposed tariffs state that "The Utility shall advise the customer that appliance services are also provided by plumbers and contractors."

General Order (GO) 96-B does not allow utilities to seek approval for rate increases by advice letter except when that method has been specifically authorized by the Commission or statute. Resolution G-2972, which initially approved the fees for certain appliance connection services and set-timed appointments, authorized SoCalGas to seek subsequent rate changes related to these services by advice letter.

D. 01-11-068 did not provide for SoCalGas to use the advice letter process to seek approval for rate increases for Seismic Valve service. D.01-11-068 approved charges for certain seismic valve services, but the decision makes no mention of the method by which SoCalGas should seek subsequent changes in the fees for these services. A request to increase the rates for seismic valve services should be addressed in an application or in its next General Rate Case proceeding. Therefore, the request to increase fees for seismic valve services is denied.

SoCalGas' proposal to eliminate the option to pay for appliance connection services and seismic valve services at the time of service is reasonable. Adopting this proposal will lessen exposure of utility employees to crimes and allow SoCalGas to maintain separation of adequate system of business controls and separation of duties for its employees. Segregation of duties in connection with customer billings includes the provisions that "no one person serves the customer, prepares the billing, collects the customer payment and records the payment in the accounting system."

Resolution G-2972 also stated in the discussion:

"1. There could be several problems with the proposal by SoCal to collect on the site for these services. Cash transactions may pose a problem by making field representatives more vulnerable to crimes."

Resolution G-3438 SoCalGas/AL 3995/beg

January 21, 2010

SoCalGas proposes to make payment due dates consistent with Rule 9.C.1 for customers billed on their regular gas service bill. This aspect of the SoCalGas proposal is reasonable.

This will essentially give all customers a convenient payment option for appliance connection services. (Customers already have the option to include payment for seismic valve services on the bill for regular gas service.) Under this option, residential customers must pay their bill within 34 days, if billed on the monthly bill for gas service. The billing time allowed for other customer classes will be the same as that allowed in Rule 9.C.1, which varies from five to as little as nineteen days, depending on the bill frequency

SoCalGas should maintain the billing due date at 30 days for customers choosing separate billing. The proposed revision to require payment in 20 days instead of the current 30 days when billing is done separately from the monthly gas bill is denied.

If customers choose to be billed separately, SoCalGas proposes to reduce the bill due date from 30 to 20 days. Generally, the customers who opt for separate billing do not receive a monthly bill from SoCalGas because they receive gas service through a master meter (i.e. apartment complex or mobile home park). These customers are not subject to the threat of having their gas service terminated. SoCalGas' sole justification for the changes in language related to billing due dates is that it "aligns billing for all customers utilizing these service offerings." It is unclear how the reduction in due date when billed separately helps to align customers' obligations any more than when the due date was within 30 days for all customers, particularly since Rule 9.C.1 allows residential customers to pay their normal monthly bill within 34 days. SoCalGas should maintain the billing due date at 30 days for separate billing.

We deny SoCalGas' proposal to revise existing tariff language to enable it to terminate service for failure to timely pay for the seismic valve service.

The current tariffs have language that does not allow SoCalGas to terminate gas service for failure to pay for seismic valve adjustment charges. We will not adopt SoCalGas' proposal to delete language that currently does not allow SoCalGas to terminate gas service for failure to pay for any seismic valve services rendered pursuant to Rule 10. To minimize the risk of non-payment for these services, we direct SoCalGas to inform the customer requesting service what its charges are for these services before service is provided. Additionally, SoCalGas must ensure that, in accordance with its current and proposed tariff, its staff advises the customer requesting the appliance connection service that these services can be obtained from other contractors and plumbers. Customers should be encouraged to compare the utility's cost of providing this service with other providers before making the final decision to have the utility provide the service. In case of non-payment for the appliance connection and seismic valve services, SoCalGas is free to pursue collection procedures and remedies provided by common law. Termination of gas service is not warranted as an appropriate remedy to force payment for the seismic valve service or the appliance connection service which are the subject of this advice latter.

There are several reasons why we are taking this approach. First, if a private business performed the appliance connection service, and payment was not made in a timely fashion, the customer's gas utility service would not be terminated. Second, a customer's utility gas service is extremely important, and should only be terminated for nonpayment of the utility-provided gas service. When a customer does not timely pay for appliance connection or seismic valve services, this should not also result in the termination of the much more important natural gas service. Third, SoCalGas has included the language (which it wants to now delete) in its tariff for many years, and has not now provided any significant reason why a change is necessary.

In order to avoid the subsidization of the costs for appliance connections and seismic valve services by ratepayers in general, we believe that SoCalGas should include in its fees for these services an uncollectibles charge. In response to an Energy Division data request, SoCalGas indicated that uncollectibles costs are not included in the appliance connection or seismic valve service fees. Including these costs would make SoCalGas'

Resolution G-3438 SoCalGas/AL 3995/beg January 21, 2010

fees for these services more similar to the fees a private business would have to charge, in order to cover the costs for late or lack of payment. SoCalGas should include its uncollectibles charge in the fees it proposes for appliance connections in the supplemental advice letter which we order in this resolution.

#### Tariff Changes

With the changes approved here to Rule 10 by this resolution, the tariff will now read:

Rule No. 10, E.:

"1. <u>General</u>. The Utility, for a charge, shall connect <u>and/or install</u> residential <u>free standing</u> gas <u>appliances (such as gas</u> ranges, dryers, <u>and</u> barbecues <u>and gas logs</u>) for customers <u>with existing accounts</u>, provided all of the following conditions can be met:"

Rule No. 10, E.2:

Charges for connection of additional appliances will be limited to parts and materials. Where a customer is turning on new residential service, the Utility will connect the gas range, dryer and barbecue at no charge when parts are not needed. The Utility will not connect gas ranges, dryers and barbecues that would normally be installed by the builder or contractor.

Rule No. 10, F:

<u>All charges</u> Customers may elect to pay for the Set-Timed Appointment and Appliance Connection Charge (s) <u>will be included in the bill for gas</u> at the time service, <u>whenever possible</u>. <u>The charge (s) will be due and payable consistent with Rule No. 9, C.1.</u> is rendered or by separate billing. If billed <u>separately</u>, payment is due within 30 days.

Rule No. 10, G.5:

All charges for services rendered pursuant to this section will be included in the bill for gas service, whenever possible. The charge (s) will be due and payable consistent with Rule No. 9, C.1. If billed separately, payment is due within 30 days. Installment payments may be agreed to by the Utility and customer, if requested. will be due on completion of the service provided, unless other options, such as installment payments, are agreed to by the Utility and the customer. The Utility may bill for services rendered pursuant to this Section in its bill for gas service, but will not terminate gas service for failure to pay for any services rendered pursuant to this section.

#### **Current and Proposed Rates**

The table below shows current and proposed rates for Appliance Connection:

Service Program	Current	Proposed
	Rate	Rate

Resolution G-3438 SoCalGas/AL 3995/beg January 21, 2010

Connection of residential gas appliance such as range, dryer or gas barbecue	\$38.00	\$82.00
Installation of a residential gas appliance such as gas logs – parts not	n/a	\$122.00
included	11/ 4	Ψ122.00
Added cost of valve	\$5.00	\$16.00
Added cost of connector	\$11.00	\$18.00
Added cost of 3/8" gas barbecue kit, including connector, hose & fittings.	\$68.00	\$73.00
Added cost of Appliance Regulator	n/a	\$19.00
Added cost of ½" IPT Ball Valve (BBQ)	n/a	\$13.00
Added cost of 3/8" Barbeque Quick Disconnect	n/a	\$37.00
Added cost of 1/2" Barbeque Quick Disconnect	n/a	\$68.00
Added cost of 3/8" Barbeque Hose	n/a	\$28.00
Added cost of ½" Barbeque Hose	n/a	\$51.00
Added cost Dryer Vent duct	n/a	\$14.00
Added cost Dryer / Vent Clamps	n/a	\$4.00

In addition, the applicable Retail Sales Tax will be applied to all parts costs.

#### **COMMENTS**

Public Utilities Code section 311(g) (1) provides that this resolution must be served on all parties and subject to at least 30 days public review and comment prior to a vote of the Commission. Section 311(g) (2) provides that this 30-day period may be reduced or waived upon the stipulation of all parties in the proceeding.

The 30-day comment period for the draft of this resolution was neither waived nor reduced. Accordingly, this draft resolution was mailed to parties for comments. No comments were filed.

### **FINDINGS**

- SoCalGas submitted AL 3995 to revise its service charges for seismic valve services and gas appliance connection services, and revise tariff language related to bill payment for these services.
- 2. The charges for appliance connections have not been changed since 1991.
- SoCalGas' proposed increases for these charges will compensate for increases in labor, gasoline, administrative costs, modifications of manufacturers' standards and technology advances.
- SoCalGas' proposed fees for appliance connection services and pieces of equipment needed for appliance connections reflect actual costs and are reasonable.
- Resolution G-2972 authorized SoCalGas to seek approval for increases in appliance connection fees and set-timed appointment by advice letter.
- 6. D.01-11-068, which authorized the fees for seismic valve services, did not provide SoCalGas with the authorization to seek approval for increases in seismic valve services by advice letter.

Resolution G-3438 SoCalGas/AL 3995/beg January 21, 2010

- General Order 96-B does not allow utilities to seek approval for rate increases by advice letter except when authorized by Commission order or statute.
- SoCalGas' request for approval of an increase in the fees for seismic valve service should be made in an application or General Rate Case proceeding.
- SoCalGas' proposal to eliminate the option to pay for appliance connection services or seismic valve services at the time of service is reasonable. Doing so makes SoCalGas employees less vulnerable to crimes, and allows SoCalGas to better segregate employee duties.
- Allowing customers the option to make payment on their monthly gas bill for appliance connection services is reasonable, as it provides a convenient payment option with tariffed bill payment due dates.
- 11. SoCalGas' proposal to reduce the payment due dates for separate billing from 30 days to 20 days should be denied. SoCalGas has not adequately justified the reduction.
- SoCalGas should not remove language from Section 10.G.5 from Rule 10 that prevents termination of gas service for failure to pay for services rendered for appliance connections and seismic valve services.
- SoCalGas should include the cost of uncollectibles as part of its fees for appliance connections and seismic valve services.
- SoCalGas should include the cost of uncollectibles in the appliance connection fee set forth in the supplemental advice letter ordered in this resolution.

### **THEREFORE IT IS ORDERED THAT:**

- Southern California Gas Company (SoCalGas)'s proposals to increase the fees for appliance connection services and add new charges for pieces of equipment needed in providing such services are approved.
- 2. SoCalGas' proposal to increase the fees for seismic valve services in Advice Letter 3995 is denied.
- 3. SoCalGas' proposal to eliminate the payment option for appliance connection services and seismic valve services at the time that service is completed is approved.
- SoCalGas' proposal to add the customer option of being billed for appliance connection services on the bill for gas service is approved.
- SoCalGas' proposal to have payment due dates under the gas service bill payment option be in conformance with Rule 9.C.1 is approved.
- 6. SoCalGas proposal to reduce the due date for the separate billing option from 30 days to 20 days is denied.
- SoCalGas' proposal to eliminate language from Rule 10 that prevents termination of gas service for failure to pay for services rendered for appliance connections and seismic valve services is denied.
- 8. SoCalGas shall include the cost of uncollectibles in the appliance connection fee set forth in the supplemental advice letter ordered in this resolution.
- 9. SoCalGas shall submit a supplemental advice letter with revised tariff pages that are in compliance with this resolution within 10 days of its effective date.

This Resolution is effective today.

I certify that the foregoing resolution was duly introduced, passed and adopted at a conference of the Public Utilities Commission of the State of California held on January 21, 2010, the following Commissioners voting favorably thereon:

Resolution G-3438 SoCalGas/AL 3995/beg January 21, 2010

Decision (D.) 01-11-068

COM/CXW/mnt

Mailed 12/4/01

Decision 01-11-068 November 29, 2001

#### BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of Southern California Gas Company for Authority to Discontinue New Installations of Earthquake Valves on Its Facilities, and to Recover the Costs of Inspecting Earthquake Valves Already Installed. (U 904 G)

Application 00-07-040 (Filed July 24, 2000)

Glen J. Sullivan and Dale Bailey, Attorneys at Law, for Southern California Gas Company, applicant.

Mark Joseph, Attorney at Law, for Coalition of California Utility
Employees; Patrick J. Power, Attorney at Law, for Smart Safety
Systems; and Les Saffil, for SSP Wrench-Free Gas Shut-Off Valve
Company, Little Firefighter Gas Safety Products, and PlumbingHeating- and Cooling Contractors of California; interested
parties.

#### OPINION

#### 1. Summary

The Commission grants Southern California Gas Company (Applicant) authority to discontinue installations (whether by itself or by others) of automatic earthquake gas shut-off valves (EQVs) on its side of the meter. We also authorize Applicant to raise or establish certain rates and charges related to existing EQVs. Although Applicant may continue its inspections of existing EQVs not previously inspected, we do not authorize it to recover its inspection costs from core customers.

#### 2. Background

In 1995, we authorized Applicant to offer a pilot program for installation of EQVs. In Decision (D.) 96-09-044, we closed the pilot program to new customers and approved Applicant's request to allow contractors to install EQVs on its side of the meter. We did not require Applicant to inspect installations by qualified contractors. In D.98-08-032, the Commission approved Applicant's proposal to institute inspections and charge a fee to contractors for the inspections on an interim basis. The percentage of installations inspected would depend on the record of the individual contractor.

In D.00-06-038, the Commission ordered Applicant to comply with all applicable state and federal codes and regulations when contractors install EQVs on its facilities. The decision also directed Applicant to inform the Commission of its schedule and method for inspecting contractor installations not previously inspected if it believes that it would be good utility practice to do so. Applicant was allowed to request recovery of resulting costs.

111748 -1 -

A.00-07-040 COM/CXW/mnt

On July 24, 2000, Applicant filed this application to discontinue installation of EQVs on its side of the meter, as described more fully below.

### 3. Procedural History

On August 25, 2000, a protest was filed by SSP Wrench-Free Gas Shut-Off Valve Company, Little Firefighter Gas Safety Products, and Plumbing-Heating- and Cooling Contractors of California (Joint Protestants). On August 28, 2000, a protest was filed by Smart Safety Systems (SSS).

By Resolution ALJ 176-3044, dated August 3, 2000, the Commission preliminarily categorized this application as a ratesetting proceeding that was not expected to go to hearing. A prehearing conference was held on October 26, 2000. At the prehearing conference, Administrative Law Judge (ALJ) Jeffrey P. O'Donnell asked the Applicant to put into the record information relating to, among other things, safety issues. Exhibit SCG-2 responds to the ALJ's request. Assigned Commissioner Carl Wood's November 7, 2000 scoping ruling confirmed the category, determined that hearings were needed, defined the issues, established a schedule and designated ALJ O'Donnell as the principal hearing officer. Evidentiary hearings here held on February 20, 2001. The matter was submitted on May 3, 2001.

### 4. The Application

Applicant requests authority to do the following:

- Discontinue permission for any new installations of EQVs on its side of the meter, including installations by Applicant or contractors working for Applicant.
- Recover in rates the actual costs of inspecting and repairing those EQVs
  already installed by authorized independent contractors on Applicant's side of
  the meter that Applicant has not previously inspected. The costs would be
  recovered from core customers.
- Set the charge for removal of EQVs on Applicant's pipelines at \$83.28 plus materials for the first hour and \$13.87 for every quarter hour thereafter, and eliminate the current transaction fee of \$9.00.
- Set the charge for estimating the cost of removal of EQVs on Applicant's pipelines at \$34.89, if removal is not authorized at the time of the estimate.
- Set the charge at \$34.89 for any trip made to a customer's location for any reason due to the customer's, and not Applicant's, circumstances where removal of an EQV on Applicant's pipeline is not performed.
- Set the charge for restoration of gas service after an EQV shuts off gas for any reason at \$63.39.

A.00-07-040 COM/CXW/mnt

Applicant requests that it be authorized to modify its EQV program in the following manner if the Commission denies its request to discontinue it:

- EQV installations on Applicant's side of the meter would be allowed only for customers who are mandated to have EQVs by law.
- Installations would be done only by Applicant's personnel or, at its discretion, a contractor under contract with Applicant.
- Applicant would restrict the number of EQV manufacturers to a few approved by Applicant and, most likely, under contract with Applicant.
- Applicant would treat EQVs in the same manner as excess flow valves. Only
  Applicant would be allowed to install, maintain and replace EQVs. The
  customer would pay all costs for installation, maintenance and/or
  replacement when those costs are incurred.

#### 5. Discontinuance of EQV Installations

Applicant initiated installation of EQVs on its side of the meter because it believed that such installations might prove to be less expensive than installations on the customer's side of the meter. Applicant now believes that it is not less expensive to do so. Applicant states the following reasons:

- D.00-06-038 placed responsibility on Applicant for compliance with all applicable state and federal codes and regulations when contractors install EQVs on Applicant's facilities.
- New safety regulations effective in 2002.
- Costs to remove and install EQVs have increased since they were first authorized in 1996.
- D.00-06-038 placed responsibility on Applicant for ongoing inspection and maintenance of EQVs installed on its side of the meter.
- The United States Department of Transportation adopted a new Operator Qualification Rule effective October 28, 2002. The effect of the rule is that Applicant's costs will increase because personnel working with EQVs on its facilities will have to have additional training.

Applicant is not willing to assume the increased risk resulting from its responsibility for compliance with all applicable state and federal codes and regulations when contractors install EQVs on its

A.00-07-040 COM/CXW/mnt

facilities. Applicant states that it is not compensated for the increased risk. Applicant also points out that no other California gas utilities allow installation of EQVs on their pipelines.

Joint Protestants (other than SSS) state that Applicant should not be allowed to discontinue new installations of EQVs on its side of the meter because EQV installation is required in some areas and may be required statewide in the future. In addition, installation on the customer's side of the meter would be more expensive. SSS, however, does not oppose discontinuance.

We conclude that the application should be granted in this respect. Applicant began its EQV program of its own volition. The program was intended to pay for itself. No ratepayers other than program participants were to have borne the cost of the program. We have not required other utilities subject to our jurisdiction to have such a program. Although, as some of the protests note, EQV installation is required in some areas, there is no requirement that EQVs be installed on the utility's side of the meter. Whether the program continues or not, ratepayers will still have the ability to install EQVs. The installation costs will depend on engineering considerations, and may be site specific. As a result, we see no reason to require Applicant to allow additional installations of EQVs on its side of the meter. Therefore, Applicant will be authorized to discontinue allowing new installations on its side of the meter.

#### 6. Recovery of Inspection Costs

Applicant states that, due to the fact that D.00-06-038 placed responsibility on it for compliance with all applicable state and federal codes and regulations when contractors install EQVs on its facilities, it must inspect all installations not previously inspected. This will result in approximately 52,000 inspections at a cost estimated not to exceed \$400,000.

Applicant has begun its inspection program. As of December 17, 2000, it had performed 9,600 inspections. The inspections revealed 308 (3.2%) minor leaks and 87 (0.9%) cathodic protection deficiencies. The majority of the minor leaks and deficiencies occurred on EQVs installed prior to implementation of new standards that took effect on October 1, 1998. Applicant states that none of these minor leaks or deficiencies constitutes a serious safety issue or presents an immediate safety hazard. Applicant expects the results of the remaining inspections to be similar.

The customers and contractors who participated in the program chose to do so based on the rules and charges in effect at the time. Therefore, Applicant believes that charging the inspection costs to current participants would be unfair. Instead, Applicant proposes to recover the costs from all core customers. It says that the cost to individual core customers would be miniscule. Applicant states that there is a rationale for allocating the costs to all core customers because the inspections may avoid a mishap that could affect members of the public in the vicinity of a customer with a faulty EQV installation. None of the protestants addressed the inspection cost issue.

A.00-07-040 COM/CXW/mnt

We will deny the application with respect to recovery of inspection costs. Applicant has not demonstrated that the costs of further inspections are properly recoverable from core customers.

This is a program that was to be paid for by the participants who benefited from it. However, Applicant believes that charging the further inspection costs to participants would be unfair. Program participants decided to participate based on the costs specified at the time. If the additional inspection costs were to be charged to participants, Applicant would be changing the terms of the program after the fact. Had the participants known of the additional costs at the time, they may have chosen not to participate in the program. Therefore, we agree that to impose additional costs now would be unfair. However, this does not justify recovery of those costs from core customers.

If it would be unfair for program participants who benefited from the program to pay for the additional inspections, it would be much less fair to require ratepayers who did not benefit from the program to pay for them. While the Applicant must take all steps necessary to ensure the continued safe operation of these installations, it must rely on existing program revenues for this purpose.

#### 7. The Proposed Charges

The existing charges were established in 1996. Applicant represents that its proposed charges are cost based. The proposed increases are due to increased pay scales and higher administrative costs. In some cases, more skilled personnel are needed to do the job, and/or increased time is needed.

The existing charge for EQV removal is a fixed charge of \$47.50 plus a transaction charge of \$9.00. Applicant proposes to charge \$83.28 plus materials for the first hour and \$13.87 for every quarter hour thereafter, and to eliminate the transaction charge.

The current "trip charge" for estimating the cost of removal of EQVs on Applicant's pipelines is \$32.50. Applicant proposes to charge \$34.89, if removal is not authorized at the time of the estimate. Applicant proposes to use the same \$34.89 charge for any trip made to a customer's location for any reason due to the customer's, and not Applicant's, circumstances where removal of an EQV on Applicant's pipeline is not performed.

The existing charge for restoration of gas service after an EQV shuts off gas for any reason is \$50.00. Applicant proposes to charge \$63.39.

We will approve Applicant's proposed charges, which are not opposed by the other parties, and are supported by a detailed cost analysis.

#### 8. SSS Proposal

SSS proposes that Applicant's meter and the by-pass tee be made available for purchase by the customer. The meter and tee would then be leased back to Applicant. The purpose of this proposal is to facilitate installation of SSS's EQV.

A.00-07-040 COM/CXW/mnt

SSS's EQV is designed to be installed between the meter and the tee. Under its proposal, the installation would be on the customer's facilities. SSS's EQV utilizes the meter coupling to simplify installation, and the tee to avoid having to shutoff the customer's gas during installation. The result is a significant installation cost savings. SSS also represents that its proposal would mitigate Applicant's market power.

SSS states that its EQV is only in prototype form. It has not found a manufacturer at this time. SSS has not determined what its proposed purchase and lease-back program would cost Applicant to implement.

Applicant opposes SSS's proposal. Applicant argues that SSS's valve is still being designed, is still pending grant of patents, may never be financed, may never find a manufacturer, has never been installed on a gas service, and has not been certified to meet industry and government standards. Applicant states that it is not apparent that its customers will benefit from allowing SSS to install its valves on Applicant's facilities.

We do not believe that it would be appropriate to require Applicant to set up a program to benefit a specific EQV. Even if we were to consider SSS's proposal, it is premature and lacks sufficient information to be considered. We will not adopt it.

#### 9. Applicant's Responsibility for Operation of EQVs

Applicant states that the Commission found in D.96-09-044 and D.00-06-038 that it is not responsible for the operation of customer-owned EQVs installed on its facilities, including leaks from the EQV itself. Applicant asks that the Commission again make that finding.

In D.96-09-044, the Commission approved Applicant's proposed tariff language regarding its EQV program. If there is something in Applicant's tariffs that is unclear, Applicant should propose a change in its tariffs. It has not done so here.

In D.00-06-038, the Commission found that Applicant bears the duty of ensuring the safety of its pipelines, including the portions that have EQVs installed on them. Therefore, Applicant must comply with all applicable state and federal codes and regulations as well as the Commission's decisions. The applicable state and federal codes and regulations speak for themselves.

D.00-06-038 states that Applicant is responsible for the safety of its pipelines. The decision does not explicitly state that Applicant is responsible for the proper operation of the EQV in the event of an earthquake or for leaks in the EQV itself. In Ordering Paragraph 4 of D.00-06-038, the Commission stated: "SCG shall also state its position on how failures of the EQV device that it discovers during routine inspection at the meter are addressed with the EQV-owning customer and timely corrected by that customer." This is a requirement to provide information, nothing more.

Determination of whether Applicant is responsible for the proper operation of EQVs in the event of an earthquake or for leaks in the EQV itself would require, as a minimum, examination and interpretation of all of the applicable pipeline safety rules, regulations and codes, Applicant's tariffs for the

#### A.00-07-040 COM/CXW/mnt

EQV program, and Applicant's agreements, commitments and contracts related to the program. Applicant has made no showing in this proceeding that would allow us to make such a determination, even if we were to engage in such an advisory process. Therefore, we will not modify or further discuss our findings in D.96-09-044 and D.00-06-038.

#### 10. Comments on Proposed Decision

On November 19, 2001, the alternate decision in this proceeding of Commissioner Wood was filed with the Commission and served on the parties in accordance with Section 311(d) of the Public Utilities Code and Rule 77.1 of the Commission's Rules of Practice and Procedure. Comments were filed by Smart Safety Systems.

### **Findings of Fact**

- 1. A notice of the filing of the application appeared in the Daily Calendar on July 28, 2000.
- 2. Applicant began its EQV program of its own volition.
- 3. While EQV installation is required in some areas, there is no requirement that EQVs be installed on the utility's side of the meter.
- Other utilities subject to our jurisdiction are not required to allow installation of EQVs on their facilities.
  - 5. Applicant's proposed charges are reasonable.
  - 6. Applicant's EQV program is supposed to be paid for by the participants who benefited from it.
  - 7. No ratepayers, other than program participants, have directly benefited from the program.
- 8. EQVs installed on Applicant's side of the meter are installed downstream of the pressure regulator, and operate at the same pressure as the customer's facilities.
- 9. Serious gas leaks can easily be detected by smelling the odorant present in the gas, and would be quickly reported by the EQV customer or Applicant's meter readers performing routine safety checks while reading the meter.
- 10. The inspections by Applicant of EQV installations not previously inspected have revealed no serious safety issues or immediate safety hazards, and Applicant does not expect any to be found.
  - 11. Charging the inspection costs to EQV program participants would be unfair.
  - 12. Charging the inspection costs to core customers would be unfair.
- 13. Applicant has made no showing in this proceeding that would allow the Commission to determine whether Applicant is responsible for the proper operation of EQVs installed on its side of the meter in the event of an earthquake or for leaks in the EQV itself.

### **Conclusions of Law**

- 1. Applicant's request to discontinue installation of EQVs on its side of the meter should be approved.
- 2. Applicant's proposed charges should be authorized.

#### A.00-07-040 COM/CXW/mnt

- 3. Core customers should not be required to pay for the costs of inspecting EQVs not previously inspected.
- 4. Applicant's request to recover from core customers the costs of inspecting EQVs not previously inspected should be denied.
- 5. This decision should be made effective immediately to enable Applicant to discontinue EQV installations on its side of the meter and to implement the proposed charges without delay.

#### ORDER

#### IT IS ORDERED that:

- 1. The request of Southern California Gas Company (Applicant) to discontinue installation of automatic earthquake gas shut-off valves (EQVs) on its side of the meter is granted.
- 2. Applicant's request to recover from core customers the costs of inspecting EQVs not previously inspected is denied.
  - 3. Applicant may continue its inspections of existing EQVs not previously inspected.
  - 4. Applicant's proposed charges are authorized.
  - 5. Except as specifically provided for herein, the application is denied.
  - 6. This application is closed.

This order is effective today.

Dated November 29, 2001, at San Francisco, California.

Category: A. Customer Service Field

Category-Sub 1. Customer Service Field Training Manager

Cost Center: 2200-0345.000 - CUSTOMER SERVICE FIELD TRAINING MANAGER

#### **Activity Description:**

This cost center contains the labor and non-labor costs associated with the management and oversight of field operations training, quality assurance and operations qualification certification activities.

### Forecast Methodology:

### Labor - 5-YR Average

The five-year average forecast methodology best represents the level of change of expense that occurs in this cost center, which remains reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

### Non-Labor - 5-YR Average

The five-year average forecast methodology best represents the level of change of expense that occurs in this cost center, which remains reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

### NSE - 5-YR Average

NSE is not applicable to this cost center.

Cost Center: 2200-0345.000 - CUSTOMER SERVICE FIELD TRAINING MANAGER

#### Cost Center Allocation Percentage Drivers/Methodology:

#### **Cost Center Allocation Percentage for 2009**

The allocation is based on the Customer ServiceTraining Manager's estimate of the time he devotes to overseeing the operations at SDG&E and his assessment of the time the Administrative Associate spends supporting the organization. The labor and non-labor methodologies are the same. The assessment of the charging activites determined that the non-labor charges are driven by how labor is allocated.

#### **Cost Center Allocation Percentage for 2010**

The allocation is based on the Customer ServiceTraining Manager's estimate of the time he devotes to overseeing the operations at SDG&E. The labor and non-labor methodologies are the same. The assessment of the charging activites determined that the non-labor charges are driven by how labor is allocated.

#### Cost Center Allocation Percentage for 2011

The allocation is based on the Customer ServiceTraining Manager's estimate of the time he devotes to overseeing the operations at SDG&E. The labor and non-labor methodologies are the same. The assessment of the charging activites determined that the non-labor charges are driven by how labor is allocated.

#### Cost Center Allocation Percentage for 2012

The allocation is based on the Customer ServiceTraining Manager's estimate of the time he devotes to overseeing the operations at SDG&E. The labor and non-labor methodologies are the same. The assessment of the charging activites determined that the non-labor charges are driven by how labor is allocated.

Cost Center: 2200-0437.000 - CUSTOMER SERVICES SOUTH INLAND DIRECTOR

#### **Cost Center Allocation Percentage Drivers/Methodology:**

#### **Cost Center Allocation Percentage for 2009**

Shared services percentages are based on estimated labor hours or FTEs for South Inland SCG and SDG&E. This method supports the shared management labor for the Director and Administrative Assistant. Labor and non-labor percentages are the same. Non-labor in this cost center is in support of the shared management functions of the FTEs in this cost center and follows the same allocation as labor.

#### **Cost Center Allocation Percentage for 2010**

Shared services percentages are based on estimated labor hours or FTEs for South Inland SCG and SDG&E. This method supports the shared management labor for the Director and Administrative Assistant. Labor and non-labor percentages are the same. Non-labor in this cost center is in support of the shared management functions of the FTEs in this cost center and follows the same allocation as labor.

#### **Cost Center Allocation Percentage for 2011**

As a result of the recent reorganization efforts, this cost center was eliminated in second quarter 2010.

### **Cost Center Allocation Percentage for 2012**

As a result of the recent reorganization efforts, this cost center was eliminated in second quarter 2010.

3. Customer Service Field Staff Manager

Cost Center: 2200-0942.000 - CS FIELD STAFF MANAGER

#### **Activity Description:**

This cost center contains the costs associated with the customer service field staff. The activities performed by this group include identifying best practices and opportunities for improvement, developing and implementing new programs, functioning as a center of technical expertise concerning the policies and practices in each area of discipline, project management of large cross functional projects and activities associated with the customer service operations, serving as a subject matter expert in working with Information Technology and outside vendors to maintain and improve customer service field software applications, and designing and implementing new data collections systems and maintaining historic data bases for management and regulatory purposes.

#### Forecast Methodology:

#### Labor - 5-YR Average

The five- year average forecast methodology best represents the level of change of expense that occurs in this cost center, which remains reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

#### Non-Labor - 5-YR Average

The five- year average forecast methodology best represents the level of change of expense that occurs in this cost center, which remains reasonably static over time. The five-year average avoids the potential for artificially inflating or deflating results based on short term change.

### NSE - 5-YR Average

NSE is not applicable to this cost center.

Category-Sub: 3. Customer Service Field Staff Manager
Cost Center: 2200-0942.000 - CS FIELD STAFF MANAGER

#### **Cost Center Allocation Percentage Drivers/Methodology:**

#### **Cost Center Allocation Percentage for 2009**

The shared services allocation percentage is based on the number of FTE's benefitted by the activiities performed by the cost center. As Customer Service Field (CSF) Staff supports the CSF activities of both SCG and SDG&E, the same support provided to one is provided to the other, while the actual demands are largely based on the size of each.

### **Cost Center Allocation Percentage for 2010**

The shared services allocation percentage is based on the cost center manager's assessment of the activities and contributions of the individual employees charging the cost center.

#### Cost Center Allocation Percentage for 2011

The shared services allocation percentage is based on the cost center manager's assessment of the activities and contributions of the individual employees charging the cost center.

#### **Cost Center Allocation Percentage for 2012**

The shared services allocation percentage is based on the cost center manager's assessment of the activities and contributions of the individual employees charging the cost center.

Beginning of Workpaper 2200-2145.000 - SDGE EASTERN PROJECT MANAGER

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward

Category: A. Customer Service Field

Category-Sub 4. SDG&E Eastern Project Manager

Cost Center: 2200-2145.000 - SDGE EASTERN PROJECT MANAGER

#### **Activity Description:**

This cost center contains the labor and non-labor costs associated with the services provided by a SCG manager to San Diego Gas & Electric (SDG&E) field operations. The District Operations Manager (DOM) is a SCG employee with management responsibilities for SDG&E's Eastern and Metro facilities.

### **Forecast Methodology:**

#### Labor - Base YR Rec

The base year forecast methodlogy best represents the level of expense that occurs in this cost center. Between 2005 and 2008, these activities were performed by an SDG&E employee and charged to a non-shared SDG&E cost center.

#### Non-Labor - Base YR Rec

The base year forecast methodlogy best represents the level of expense that occurs in this cost center. Between 2005 and 2008, these activities were performed by an SDG&E employee and charged to a non-shared SDG&E cost center.

#### **NSE - Base YR Rec**

NSE is not applicable to this cost center.

#### **Cost Center Allocation Percentage Drivers/Methodology:**

#### **Cost Center Allocation Percentage for 2009**

The allocation methodology used is based on the FTEs time in this cost center which is 100% in support of SDG&E. The District Operatons Manager is a SCG employee and working 100% for SDG&E.

#### **Cost Center Allocation Percentage for 2010**

The allocation methodology used is based on the FTEs time in this cost center which is 100% in support of SDG&E. The District Operatons Manager is a SCG employee and working 100% for SDG&E.

#### **Cost Center Allocation Percentage for 2011**

The allocation methodology used is based on the FTEs time in this cost center which is 100% in support of SDG&E. The District Operatons Manager is a SCG employee and working 100% for SDG&E.

### **Cost Center Allocation Percentage for 2012**

The allocation methodology used is based on the FTEs time in this cost center which is 100% in support of SDG&E. The District Operatons Manager is a SCG employee and working 100% for SDG&E.

Beginning of Workpaper 2200-2206.000 - QUALITY ASSURANCE

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward

Category: A. Customer Service Field
Category-Sub 5. Quality Assurance

Cost Center: 2200-2206.000 - QUALITY ASSURANCE

#### **Activity Description:**

This cost center contains the labor and non-labor costs of SCG employees who oversee, manage and support quality assurance (QA) and operation qualification (OQ) functions for SCG and on behalf of SDG&E.

### Forecast Methodology:

### Labor - 3-YR Average

The Quality Assurance group was not fully implemented and staffed until mid-year 2006. The three-year average forecast methodology best represents the level of change of expense that occurs in this cost center, which remains reasonably static over time. The three-year average avoids the potential for artificially inflating or deflating results based on short term change.

#### Non-Labor - 3-YR Average

The Quality Assurance group was not fully implemented and staffed until mid-year 2006. The 3 year average forecast methodology best represents the level of change of expense that occurs in this cost center, which remains reasonably static over time. The 3 year average avoids the potential for artificially inflating/deflating results based on short term change.

#### **NSE - 3-YR Average**

NSE is not applicable to this cost center.

Cost Center: 2200-2206.000 - QUALITY ASSURANCE

#### **Cost Center Allocation Percentage Drivers/Methodology:**

#### Cost Center Allocation Percentage for 2009

The Quality Assurance Team Lead provides guidance and work direction over the quality assurance activities at both SCG and SDG&E. The allocation is based on the manager's best assessment of the Quality Assurance Team Lead's annual activities devoted to the oversight of the SDG&E quality assurance operation. The labor and non-labor methodoligies are the same. The assessment of the charging activitiy determined that the non-labor charges ae driven by how labor is allocated.

#### **Cost Center Allocation Percentage for 2010**

The Quality Assurance Team Lead provides guidance and work direction over the quality assurance activities at both SCG and SDG&E. The allocation is based on the manager's best assessment of the Quality Assurance Team Lead's annual activities devoted to the oversight of the SDG&E quality assurance operation. The labor and non-labor methodoligies are the same. The assessment of the charging activitiy determined that the non-labor charges ae driven by how labor is allocated.

#### **Cost Center Allocation Percentage for 2011**

The Quality Assurance Team Lead provides guidance and work direction over the quality assurance activities at both SCG and SDG&E. The allocation is based on the manager's best assessment of the Quality Assurance Team Lead's annual activities devoted to the oversight of the SDG&E quality assurance operation. The labor and non-labor methodoligies are the same. The assessment of the charging activity determined that the non-labor charges ae driven by how labor is allocated.

#### **Cost Center Allocation Percentage for 2012**

The Quality Assurance Team Lead provides guidance and work direction over the quality assurance activities at both SCG and SDG&E. The allocation is based on the manager's best assessment of the Quality Assurance Team Lead's annual activities devoted to the oversight of the SDG&E quality assurance operation. The labor and non-labor methodoligies are the same. The assessment of the charging activity determined that the non-labor charges ae driven by how labor is allocated.

Cost Center: 2200-2154.000 - CCC RESOURCE AND SERVICE LEVEL MANAGER

#### **Activity Description:**

Labor and non-labor costs associated with managing the clerical, financial, scheduling and forecasting activities within the Customer Contact Center for SCG and San Diego Gas & Electric (SDG&E), as well as managing the CCC's level of service.

#### **Forecast Methodology:**

#### Labor - Zero-Based

A zero based forecast was used to estimate the labor expense in this cost center, based on the annual salary of the manager charging the cost center.

#### Non-Labor - Zero-Based

A zero based forecast was used to estimate non-labor expense in this cost center, based on expected non-labor expenses for the manager.

#### NSE - Zero-Based

NSE is not applicable to this cost center.

Category: B. Customer Contact Center

Category-Sub: 1. CCC Resource & Service Level Manager

Cost Center: 2200-2154.000 - CCC RESOURCE AND SERVICE LEVEL MANAGER

#### Cost Center Allocation Percentage Drivers/Methodology:

#### **Cost Center Allocation Percentage for 2009**

The CCC Resource and Service Level Manager's labor is allocated based on total FTEs. There are 18 SCG and 5 SDGE FTEs (23 FTEs total) reporting to the manager. Based on historical activity, a flat rate for non-labor will be allocated for the estimated mileage and other miscellaneous non labor expenses. The weighted average calulation allocates 24.40% to SDG&E.

#### **Cost Center Allocation Percentage for 2010**

The CCC Resource and Service Level Manager's labor is allocated based on total FTEs. There are 18 SCG and 5 SDGE FTEs (23 FTEs total) reporting to the manager. Based on historical activity, a flat rate for non-labor of \$3,000 will be allocated for the estimated mileage and other miscellaneous non labor expenses. The weighted average calulation allocates 23.15% to SDG&E.

#### Cost Center Allocation Percentage for 2011

The CCC Resource and Service Level Manager's labor is allocated based on total FTEs. There are 18 SCG and 5 SDGE FTEs (23 FTEs total) reporting to the manager. Based on historical activity, a flat rate for non-labor of \$3,000 will be allocated for the estimated mileage and other miscellaneous non labor expenses. The weighted average calulation allocates 23.15% to SDG&E.

#### Cost Center Allocation Percentage for 2012

The CCC Resource and Service Level Manager's labor is allocated based on total FTEs. There are 18 SCG and 5 SDGE FTEs (23 FTEs total) reporting to the manager. Based on historical activity, a flat rate for non-labor of \$3,000 will be allocated for the estimated mileage and other miscellaneous non labor expenses. The weighted average calulation allocates 23.15% to SDG&E.

Area: CS - FIELD OPERATIONS & CUSTOMER CONTACT

Witness: Fong, Edward Category: C. Meter Reading

Category-Sub 1. Meter Reading Aliso Viejo

Cost Center: 2200-0370.000 - METER READ ALISO VIEJO

#### **Activity Description:**

This cost center contains the labor and non-labor costs associated with the non-management meter reading activities of the meter reading employees at Aliso Viejo district/base. This meter reading group performs meter reading and meter reading access related work connected with SCG gas meters and SDG&E electric meters in the south Orange County area and joint meter reading territory of both Companies. As a result of SDG&E smart meter, this shared service cost center will be a non-shared service cost center beginning in TY2012.

#### Forecast Methodology:

#### Labor - 3-YR Average

The three-year average forecast methodology best represents the labor costs to be forecast because water meter reading services were terminated with two Orange County municipalities in 2006 and 2007 and should not be included in forecasted expense. The three-year average methodology captures the high and low expenditures seen under a variety of conditions.

#### Non-Labor - 3-YR Average

The three-year average forecast methodology best represents the labor costs to be forecast because water meter reading services were terminated with two Orange County municipalities in 2006 and 2007 and should not be included in forecasted expense. The three-year average methodology captures the high and low expenditures seen under a variety of conditions.

#### NSE - 3-YR Average

NSE is not applicable to this cost center.
