21	Service period to meter read date 365 days / 12 (months) / 2 (half month) (See [a] below)			15.21
22	Total Revenue Lag Days			40.41

[a] The meter is read 12 times a year, assuming service is rendered evenly throughout these meter reading periods, the average service period to meter reading is a 15.21 days lag.

Note:

Customer accounts receivable balances include taxes and certain miscellaneous revenue items like service charges. Because both accounts receivable balances and revenue include these items, they are determined on a comparable basis. The franchise/municipal surcharge and utility user taxes that were part of the accounts receivable balance remained in the accounts receivable balance for each month and revenues were increased by the tax amount to reflect a proper match between accounts receivable and revenues

SCG processes the invoices for each meter route, and therefore mails the invoices the next day or night. Meters are read on a 21 day cycle, and 82.3% meters in 2009 were read on cycle, but 13.1% were read one day late and 4.0% were one day early. Automatic meter reads , which adopted by three thousand commercial customers and accounted for 15% of 2009 revenue, were excluded from the data for meter reading lag analysis due to the difficulty of getting the data to calculate the weighting. Because it takes five days to process the bills in the automatic meter reading system, the meter reading lag would have been greater, if this five day delay had been incorporated in the data.
