Cummins Westport The Natural Choice

ISX12 G Overview

June 12, 2013

Scott Baker

Director, Product & Market Planning

Cummins Westport Inc. (CWI) A Joint Venture of Westport & Cummins

Delivered over 35,000 engines. New 10 year Agreement 2012

Natural Gas Engine Introduction

• Target Markets

- Regional haul truck / tractor
- Vocational
- Refuse

• Platform & Technology

- Cummins 11.9 litre ISX12 diesel is base engine
- Utilizing spark-ignition with cooled EGR & three way catalyst (TWC)
 - Same combustion technology as 8.9 liter ISL G engine

CWI Combustion Technology Spark Ignited Stoichiometric with Cooled EGR

What is Stoichiometric Combustion?

- Ideal combustion process where fuel is burned completely
 - Ideal air/fuel ratio chemically correct mixing of fuel and air
 - Consumes all fuel & air without excess of either in exhaust
 - No oxygen in exhaust stream allows Three Way Catalyst to handle NOx control
- <u>Benefits:</u>
 - Increased power density
 - Increased thermal efficiency
 - Decreased emissions

Three Way Catalyst Aftertreatment

- Similar to catalyst on gasoline passenger cars.
- Packaged as a muffler. Vertical or horizontal mount.
- Easy to install
- Weighs ~100 pounds
- Passive device
 - No Regeneration
 - No SCR
 - No Maintenance

ISX12 G

- Key Product Attributes
 - 11.9 litres
 - Spark ignited, in-line 6 cylinder
 - Dedicated natural gas engine
 - CNG or LNG
 - Capable of using up to 100% Biomethane
 - Engine braking

- EPA/CARB certified including 2013 GHG standards
- Three Way Catalyst after-treatment
- Manual/Automatic Transmission capable
 - Automated manuals anticipated by 2014
- Ratings 320 to 400 hp, 1150 to 1450 lb-ft
 - Ratings up to 350 hp, 1450 lb-ft in production now
 - 400 / 1450 & 385 /1350 ratings to be released later this year

ISX12 G -Technical Specifications

Advertised Horsepower	320-400 HP	239-298 KW
Peak Torque	1150-1450 lb-ft	1559-1966 N ' M
Governed Speed	2100 RPM	
Clutch Engagement Torque	700 lb-ft	949 N ' M
Number of Cylinders	6	
System Weight	2750 lb	1247 kg
Engine (Dry)	2650 lb	1202 kg
Aftertreatment System	100 lb	45 kg

2013 ISX12 G Ratings

ENGINE MODEL	ADVERTISED HP(KW)	PEAK TORQUE LB-FT (Nm) @ RPM	GOVERNED SPEED				
Line Haul Truck Applications							
ISX12 G 400	400 (298)	1450 (1966) @ 1200	2100 RPM				
ISX12 G 385	385 (287)	1350 (1830) @ 1200	2100 RPM				
ISX12 G 350	350 (261)	1450 (1966) @ 1200	2100 RPM				
ISX12 G 330	330 (246)	1250 (1695) @ 1200	2100 RPM				
ISX12 G 320	320 (239)	1150 (1559) @ 1200	2100 RPM				
Refuse Truck Applications							
ISX12 G 350R	350 (261)	1350 (1830) @ 1200	2100 RPM				
ISX12 G 350R	350 (261)	1450 (1966) @ 1200	2100 RPM				
ISX12 G 330R	330 (246)	1250 (1695) @ 1200	2100 RPM				
ISX12 G 320R	320 (239)	1150 (1559) @ 1200	2100 RPM				
Clutch Engagement Torque – 700 LB-FT (949 Nm) Net Weight (Dry) - 2650 LB (1202 KG)							

Program Status Update

- Nearly 2,000,000 miles of field testing completed
 - Numerous tractor-trailer and refuse collection field test fleets throughout the U.S.
- Limited Production of ISX12 G engines started April 2013
 - Limited Production peak rating is 350 hp / 1,450 lb ft torque
 - These engines are not upratable
- Full availability of the ISX12 G product line expected by August 2013
 - Includes 385 and 400 hp ratings

Service Guidelines

- Recommendation for best reliability and durability is to limit ISX12 G to maximum 80,000 lb GVW applications.
- PowerSpec tool with ISX12 G now available
 - www.powerspec.cummins.com

ISX12 G Warranty

- Automotive Base warranty for Cummins Westport natural gas engines is same as Cummins diesel base platform
- 2 Year / 250,000 Mile Warranty
 - 100% parts and labor on warrantable failures*
 - Travel or towing when an engine is disabled by a warrantable failure
 - Consumables not reusable due to covered failure
 - Limited progressive damage, including aftertreatment
- Extended Coverage packages are available through Cummins distributors

Maintenance Intervals

- Most maintenance intervals are the same as the ISX12 diesel (e.g. oil drain, filter changes)
- Natural gas related component intervals are similar to ISL G
 - Example: spark plug interval at 1,500 hours
- CES20074 natural gas engine oil is required

CNG & LNG Fuel Compatibility

- ISX12 G is compatible with natural gas stored onboard the vehicle as CNG or LNG
- End-users can choose CNG or LNG based on each fuel's respective pros / cons & the best fit in the application
 - LNG systems store more fuel for a certain space claim, but fuel will vent if not used regularly
 - CNG systems are typically larger and heavier than LNG systems for the same fuel capacity, but fuel won't vent when vehicle is parked
 - When using fast-fill CNG refueling, the net usable capacity of CNG systems can be quite a bit less than the gross capacity (e.g. 20-30% less)

Near-Zero Emissions Capability

- Cummins Westport plans to further develop the stoich EGR / TWC technology for near-zero NOx emissions
 - Engine development required to achieve 0.02 to 0.05 g/bhp-hr NOx
 - Technology advancements can be deployed throughout Cummins Westport's natural gas engine product line (6 to 12 liters)
- NOx reduction opportunities:
 - Cold-cycle emissions
 - Near-zero NOx has been demonstrated over hot cycles
 - Transient emissions
 - Optimize control system for low NOx during transient events
 - Emissions variability (engine to engine, test to test)

www.cumminswestport.com

- Great source of information about natural gas engines and vehicles.
- Features the *Natural Gas Academy*, a series of instructional videos
 - Designed to provide a general overview of natural gas as a fuel whether it is compressed (CNG) or liquefied (LNG), how it is used with vehicles, engine walkaround videos, and maintenance facility recommendations
