SOCALGAS' RATE INCREASE REQUEST

On October 6, 2017, Southern California Gas Company (SoCalGas®) filed an application with the CPUC requesting to increase revenues for its 2019-2022 (GRC)¹. SoCalGas requested to increase revenues by \$480 million to \$2.989 billion in 2019. Based on all the information presented in this proceeding, the CPUC will determine the rates that SoCalGas will collect from its consumers to cover its operating and maintenance costs for 2019. As part of this proceeding, the CPUC will also decide whether to approve SoCalGas' proposal to increase rates an additional 8.5 percent in 2020, 6.2 percent in 2021, and an additional 6.2 percent in 2022.²

Every three years, SoCalGas is required to file a GRC with the CPUC.³ GRCs determine the total amount of money a utility is allowed to collect through rates in a given year. How the increase is assigned to customer groups is determined in separate proceedings. This particular application does not include the cost to purchase natural gas for SoCalGas customers. Those costs are evaluated and authorized in a separate proceeding.

SoCalGas' primary reasons for the rate increases are:

- To continue to invest in its gas delivery system to enhance safety and reliability, and to manage risks that could impact their employees, customers, and/or system;

- To continue to invest in the needs of over 21 million customers by enabling diverse customer service capabilities and efficiencies, and to empower customers with information and tools to better manage their gas use;
- To meet regulatory demands and compliance requirements driven by system safety and reliability and environmental compliance;
- To invest in efforts and programs to maintain a highly-trained, qualified, and diverse workforce; and
- To invest in the gas system and technologies that advance clean energy for customers and the environment.
