Subject: O&M Expenses and Capital Expenditures on Gas Engineering – Auxiliary Equipment

Please provide the following:

1. Please provide the 2014 adjusted-recorded O&M expenses and capital expenditures for Auxiliary Equipment in the same format and breakdown as those provided previously in an email response on 9/8/2014 to an informal data request from Clayton Tang “SDG&E/SOCALGAS-ORA-INFORMAL-04 B”.

SoCalGas Response:

2014 financial information will not be available until after SoCalGas makes its 10-K filing with the SEC in early 2015. It is currently expected that SoCalGas will provide the adjusted recorded 2014 financial information to ORA in March 2015.

2. Table RKS-25 on page RKS-81 of SCG-07 shows that in 2015, it is estimated that SoCalGas will spend \$5.353 million on capital expenditures on High Pressure Data Synchronization. It is about mid-February now in 2015. Please provide the current status of this project. Please also provide the current spending timeline for this project through 2015.

SoCalGas Response:

The projects represented in the GRC are developed as a snapshot-in-time as of the November 2014 date of the Application filing, and are representative of the types of projects and programs the utility expects to encounter in the normal course of business. Projects that are either delayed or advanced in one area may be offset by other projects that are advanced or delayed in another as a result of changing conditions such as permit applications, resource supply, changed priorities and emergent work. The Rate Case Plan does not provide for the utility to update its forecasted expenses, either up or down, in its application except for certain, specific and identified items in the update filing following hearings. With these conditions in mind, SoCalGas responds to this question as follows:

Activity and associated expenditures did not begin on this project until September 2014; thus delaying the project and accruing expenditures from 2014 to 2015. The project remains in progress and moving forward. SoCalGas anticipates spending the remainder from the forecast in 2014 as well as the \$5.353 anticipated in 2015.
