QUESTION 1:

On September 5, SoCalGas/SDG&E provided an amended response to ORA data request 47, question 2. In the response SoCalGas/SDG&E identified Line 1032 as now being a distribution line rather than a transmission line. A similar change was made to the marking on the second amended response to ORA data request 64 on September 1, to ORA data request 64, question 2, to change the identification of Line 1032 from transmission to distribution.

SoCalGas/SDG&E in the amendment to ORA-47, question 2, stated:

“Additionally, the graphical representation of Line 1032 near the community of Pala has been changed to correctly represent it as a high-pressure distribution main and its line number removed from the map.”

Note: The amended response to ORA-47 is dated September 1, but the updated attachment was not provided until 9/5.

- a. When did Line 1032 change from transmission to distribution service?
- b. Why did SoCalGas/SDG&E change Line 1032 from transmission to distribution service?
- c. What operational and system changes needed to occur to Line 1032 to convert it from transmission to distribution service?
- d. Please provide the records related to the change from transmission to distribution service for Line 1032.
- e. Does SoCalGas/SDG&E intend to keep Line 1032 as a distribution line?

RESPONSE 1:

- a. Line 1032 has always been a distribution line. It was inadvertently depicted as a transmission line on the maps provided in response to ORA DR-47, Question 2 dated November 29, 2016, and in the original and amended response to ORA DR-64, Question 2 dated February 1, 2017 and April 27, 2017, respectively. It should have been graphically represented as a distribution line.
- b. N/A. Please see the response to Question 1(a) above.
- c. N/A. Please see the response to Question 1(a) above.
- d. N/A. Please see the response to Question 1(a) above.
