ADVICE LETTER NO. 4258

ISSUED BY Lee Schavrien

DATE FILED Jul 15, 2011

DECISION NO. 11-03-029

Senior Vice President

EFFECTIVE Oct 1, 2012

RESOLUTION NO. 4258

APPLICABILITY

Applicable to transportation of natural gas on the Utility’s Transmission System to the interconnection points with the Pacific Gas & Electric Company (PG&E) system and with all interstate and international pipelines (“Upstream Pipelines”), but excluding California-produced gas supply lines. Service under this Schedule is available to any creditworthy party. All eligible participants are collectively referred to herein as “Customers” unless otherwise specified.

TERRITORY

Applicable throughout the service territory.

RECEIPT POINTS

The Receipt Points available for service under this schedule are a Citygate Pool agreement as described in Schedule No. G-POOL or a SoCalGas storage account.

OFF-SYSTEM DELIVERY POINTS

The Delivery Points available for service under this schedule are the Utility Transmission System’s interconnection points with the Upstream Pipelines as described above and listed in Section D.6. of Rule No. 30.

(a) Through a separate application to the CPUC (see “Firm Off-System Delivery Service” Section below).

BILLING CALCULATION

Monthly Volumetric Charge:

The Volumetric Charge for each billing period shall be calculated using the applicable volumetric rate multiplied by the scheduled quantities during the billing period.

Monthly Volumetric Charge = Volumetric Rate * Quantities of Gas scheduled during billing period

(Continued)
SPECIAL CONDITIONS

GENERAL

1. The definitions of the principal terms used in this schedule are found either herein or in Rule No. 1, Definitions.

2. Service under this schedule shall be curtailed in accordance with the provisions of Rule No. 23.

3. Any disputed bill will be treated in accordance with Rule No. 11, Disputed Bills.

4. As a condition precedent to service under this schedule, an executed Master Services Contract (Form No. 6597), and an executed Receipt Point Master Agreement (RPMA, Form No. 6597-18), and an executed Off-System Delivery (OSD) Service Contract (Form No. 6597-19) are required. All contracts, rates and conditions are subject to revision and modification as a result of CPUC order or rules.

5. Customer must meet the Utility’s applicable credit requirements.

6. The term of OSD service shall be for a minimum of one day.

7. If the Federal Energy Regulatory Commission or any court of competent jurisdiction issues a decision or a preliminary determination that the Utility’s provision of OSD service adversely impacts the Utility’s Hinshaw exemption, all OSD services shall be terminated immediately.

NOMINATIONS AND BALANCING

8. Nominations are required for gas transported under this rate schedule. See Rule No. 30, Transportation of Customer-Owned Gas, and Rule No. 41, Utility System Operation, for details.

9. A Customer may opt to designate one and only one nominating agent in addition to itself at any one time to nominate on all OSD service under a Customer’s RPMA. The nominating agent shall be specified in the Customer’s RPMA and shall apply to all OSD service under that Customer’s RPMA. Customer must provide appropriate written authorization to the Utility of its intent to add or change a designated nominating agent via the Nomination and Trading Authorization Form (Form No. 9924). Such designation shall be subject to that nominating agent complying with applicable tariff and contractual provisions. Customer shall provide appropriate written notice to the Utility of its intent to terminate a nominating agent via the Termination of Nominating or Trading Agent Form (Form No. 9926).

Schedule No. G-OSD

OFF-SYSTEM DELIVERY SERVICE

(Continued)

SPECIAL CONDITIONS (Continued)

NOMINATIONS AND BALANCING (Continued)

10. The Utility will make available physical displacement capability at the Delivery Points on an
interruptible basis at the applicable G-OSDI rate as shown above.

11. The Utility shall post, on its Electronic Bulletin Board (EBB), the daily G-OSDI rate for each
Delivery Point before the deadline for Cycle 1 nominations for the flow day. No interruptible OSD
service shall be charged without the G-OSDI rate first being posted on the EBB. All interruptible
OSD service used by Customers at any Delivery Point during any flow day shall be charged the same
G-OSDI rate posted for that particular Delivery Point for that particular flow day.

12. If any discount, rebate, or other waiver of G-OSDI is provided to an affiliate of the Utility, then the
Utility shall: 1) offer the same discount, rebate, or waiver to all similarly situated Customers, i.e.,
other Customers using the same Delivery Point for that particular flow day; and 2) file an affiliate
discount report as required by section III.F. of the Utility’s affiliate transaction rules.

13. A Customer’s OSD imbalance is defined as the difference between the quantity of gas scheduled into
its OSD Contract and the quantity of gas scheduled out of its OSD Contract following Cycle 5 on any
given flow day. A Customer can clear its OSD imbalance by nominating gas into or out of its OSD
imbalance account. OSD imbalances shall be resolved in accordance with the terms of Schedule No.
G-IMB if they are not cleared by the following deadlines: (1) end of the flow day for positive OSD
imbalances on gas flow days in which a High OFO has been declared; and (2) three (3) business days
after the flow day when the OSD imbalance occurred for all other imbalances. Specifically, the Buy-
Back Rate for noncore retail service (BR-R) shall be applied to resolve a positive OSD imbalance
and the Standby Procurement Charge for noncore retail service (SP-NR) shall be applied to resolve a
negative OSD imbalance. OSD Customers shall not be allowed to trade their OSD imbalances with
other OSD customers or on-system customers.

14. On any given flow day the net revenues from the interruptible and firm* OSD services in the
Southern System shall first be credited to the System Reliability Memorandum Account (SRMA) to
offset the costs of the fixed deliveries into the Southern System for that particular flow day. The
remainder, if any, of the above-mentioned interruptible and firm OSD service revenues plus the net
interruptible and firm OSD service revenues from the Southern System for the remaining flow days
plus the net interruptible and firm OSD service revenues from the Utility’s other transmission
systems shall then be credited to the Firm Access and Storage Rights Memorandum Account
(FASRMA) to offset the costs of the system modification for providing the OSD services. Finally,
any remaining interruptible and firm OSD service revenues shall be credited to the Backbone
Transmission Balancing Account (BTBA), consistent with the requirements of D.11-04-032.

* For firm OSD services net revenues from the volumetric charge only

FIRM OFF-SYSTEM DELIVERY SERVICE

15. The Utility shall hold an open season for firm OSD service to the Upstream Pipelines whenever there is an actual or potential Customer interest. If the open season is successful, the Utility shall seek CPUC approval through a separate application, which shall include a description of the open season process and an estimate of the new facility costs along with the resulting contracts with reservation and volumetric charges.
