

Shaping the Future
with Green Hydrogen.

On February 17th, 2022, SoCalGas [announced](#) our proposal to develop the [Angeles Link](#), an energy infrastructure system that could deliver reliable green hydrogen to the Los Angeles Basin for use in heavy-duty transportation, industrial processes, electric generation, and other “hard-to-electrify” sectors of the Southern California economy.

In the News

- On September 26th, SoCalGas announced that its [H2] Innovation Experience in Downey is now using renewable hydrogen that is produced onsite. The project will demonstrate the resiliency and reliability of a renewable hydrogen microgrid that could power neighborhoods using solar energy during the day and create electricity through a fuel cell powered by renewable hydrogen at night.

For more about our LEED Platinum 2,000 square-foot home, read our [press release](#).

- Hydrogen and Fuel Cell Day was on October 8th! 1.008 is the atomic weight of hydrogen and 10/08 was chosen as Hydrogen and Fuel Cell Day to help promote conversations around clean energy technologies and their significant potential in a net zero future. [Watch our Hydrogen 101 video](#).

Application Update

Legal briefing has concluded at the California Public Utilities Commission (CPUC) regarding our proposal to establish an Angeles Link Project Memorandum Account for recording incremental costs associated with the stakeholder engagement and engineering, design, and environmental work necessary to develop Angeles Link. The CPUC will next develop a proposed decision regarding the establishment of a memorandum account, which is anticipated later this year.
