SoCalGas 10th Annual Foodservice Equipment Expo a Huge Success!

SoCalGas hosted the 10th annual Foodservice Equipment Expo at the Energy Resource Center in Downey on April 25th and 26th of this year, attracting more than 1,000 attendees.

As one of the industry's largest showcases of natural gas and energy-efficient commercial foodservice equipment, the no-cost event provided the opportunity for attendees to network, learn about innovations in energy-efficient commercial equipment, and discover new performance tools that can lead to increased labor and operational savings.

Leading industry manufacturers and their representatives provided demonstrations of equipment including live-action cooking stations so attendees could sample foods such as artisan pizzas, tacos, gnocchi, waffles, beignets, and more.

In addition, SoCalGas demonstrated how foodservice equipment is tested to determine the level of energy efficiency and identify equipment that qualifies for rebate opportunities.

Financing Opportunity for Energy-Efficient Equipment Purchases

Are your customers who are purchasing energy-efficient equipment looking for low-interest financing options with quick approvals and flexible terms?

For a limited time GoGreen Business Energy Financing is providing up to \$10,000 per project to apply toward lowering interest rates on energy upgrades through its Go Low Rates promotion*.

This means participating lenders can offer your qualifying small- and medium-sized business customers reduced interest rates — as low as 0% — on projects from \$5,000 to \$5 million with an option to include non-energy components.

Rates and terms are at the discretion of the lender.

Customers must receive fuel from an investor-owned utility such as SoCalGas and meet program eligibility requirements.

GoGreen Business is a utility-supported, State of California-administered financing program.
