Cascade**Energy**®

Cascade Energy is a SoCalGas authorized contractor responsible for implementing this program through 12/31/2027.

The Industrial STAR Program is funded by California utility customers and administered by Southern California Gas Company (SoCalGas) under the auspices of the California Public Utilities Commission, through a contract awarded to Cascade Energy, LLC. ("Cascade Energy"). Program funds, including any funds utilized for rebates or incentives, will be allocated on a first-come, first-served basis until such funds are no longer available. This program may be modified or terminated without prior notice. Customers who choose to participate in this program are not obligated to purchase any additional goods or services offered by Cascade Energy or any other third party. The selection, purchase, and ownership of goods and/or services are the sole responsibility of customer. **SoCalGas makes no warranty, whether express or implied, including the warranty of merchantability or fitness for a particular purpose, of goods or services selected by customer. SoCalGas does not endorse, qualify, or guarantee the work of Cascade Energy or any other third party.** Eligibility requirements apply; see the program conditions for details.

OBTAIN REBATES FOR NATURAL GAS EQUIPMENT

The Industrial Savings, Training, Assistance, Rebate (Industrial STAR) program offers rebates and support for common natural gas-saving projects.

WHO IS ELIGIBLE?

The Industrial STAR program supports customers with industrial food processing facilities who meet both of the following criteria:

- Receive natural gas service from SoCalGas.
- Pay the Public Purpose Program (PPP) Surcharge on their utility bills.
- NAICS codes 3111-3121 (Food Processing).

Additionally, all customers must have a signed and executed Industrial STAR Program Participation Agreement to participate.

Paid invoices are required for proof of purchase; additional documentation such as spec sheets may also be required for verification. Rebate applications must be submitted within 60 days of purchase, or install, whichever is latest.

HIGH EFFICIENCY PROCESS BOILER

Earn a rebate of up to \$80,000 for a steam boiler and up to \$60,000 for a new hot water boiler to replace a standard efficiency process boiler. Input rating may not exceed 20,000 MBH.

BOILER TYPE	COMBUSTION EFFICIENCY	UNIT REBATE
Hot Water	85%	\$2.50 per MBH
	90%	\$3.00 per MBH
Steam	83%	\$4.00 per MBH

BOILER ECONOMIZERS

Earn a rebate of up to \$70,000 for a new economizer on a process heating steam boiler. Input rating may not exceed 20,000 MBH.

ECONOMIZER TYPE	UNIT REBATE
Feedwater	\$1.50 per MBH
Condensing	\$3.50 per MBH

PIPE/FITTING INSULATION

Earn a rebate of up to \$5 per linear foot or fitting of insulation on/from natural gas equipment. Pipe must be at least 0.5 inches in diameter; insulation materials/ accessories must be installed on site and according to manufacturer’s instructions.

TANK INSULATION

Earn a rebate for up to \$8 per square foot of fiberglass or foam insulation on liquid storage or transfer tank coupled to natural gas equipment. Insulation must be applied on-site.

INSULATION THICKNESS	USAGE	UNIT REBATE
1”–2”	High (Continuous)	\$4.00 per sq ft
More than 2”	High (Continuous)	\$8.00 per sq ft

OTHER REBATES

Rebates are also available for new tankless water heaters, commercial storage water heaters, and space heating boilers. Contact us for more information!

BASE INCENTIVE RATES

The Industrial Savings, Training, Assistance, Rebate (Industrial STAR) Program offers up to \$2.00/therm for custom projects depending on project scope. Incentives are based on actual savings as demonstrated by post-installation verification.

Additional incentives may be available. Industrial STAR funds are limited and are available on a first-come, first-served basis. **Contact us for more information!**

DESCRIPTION	GAS (\$/THERM)	COST CAP*
Behavioral / Retrocommissioning / Operational	\$0.50	50% FEC
Add-On Equipment	\$1.25	50% FEC
Accelerated Replacement	\$2.00	100% ARC
New Equipment / Normal Replacement	\$2.00	100% IEC

* Incentives are capped based on full equipment cost (FEC), accelerated replacement cost (ARC), or incremental equipment cost (IEC), depending on equipment type. Incentives over \$500,000 are subject to additional SoCalGas review and approval.

INDUSTRIAL SAVINGS, TRAINING,
ASSISTANCE, REBATE PROGRAM

OBTAIN CUSTOM PROJECT INCENTIVES

WHAT IS A CUSTOM PROJECT?

A custom project is a pre-approved upgrade, retrofit or new installation. Customized incentive dollars are based on how much energy the project saves. Typically, much larger in scope than a deemed or prescriptive project, custom projects can include a wide range of facilities, equipment, and project types.

WHO IS ELIGIBLE?

The program is open to eligible SoCalGas business customers who meet the following criteria:

- **Receive natural gas from SoCalGas.**
- **Pay the Public Purpose Program (PPP) surcharge on their utility bills.**
- **NAICS codes 3111-3121 (Food Processing).**

GET 0% FINANCING!

On-Bill Financing (OBF) is available at 0% interest for a term of up to 120 months. OBF must be combined with an incentive. The loan is designed to be “bill neutral” and paid back directly on your utility bill such that the monthly payment aligns with the cost savings from the energy efficient project.

The Industrial STAR Program is funded by California utility customers and administered by Southern California Gas Company (SoCalGas) under the auspices of the California Public Utilities Commission, through a contract awarded to Cascade Energy, LLC. (“Cascade Energy”). Program funds, including any funds utilized for rebates or incentives, will be allocated on a first-come, first-served basis until such funds are no longer available. This program may be modified or terminated without prior notice. Customers who choose to participate in this program are not obligated to purchase any additional goods or services offered by Cascade Energy or any other third party. The selection, purchase, and ownership of goods and/or services are the sole responsibility of customer. **SoCalGas makes no warranty, whether express or implied, including the warranty of merchantability or fitness for a particular purpose, of goods or services selected by customer. SoCalGas does not endorse, qualify, or guarantee the work of Cascade Energy or any other third party.** Eligibility requirements apply; see the program conditions for details.

HOW TO GET A CUSTOM PROJECT INCENTIVE

1 IDENTIFY, QUANTIFY, AND PRIORITIZE ENERGY EFFICIENCY OPPORTUNITIES

Enroll in the program by submitting a completed Industrial STAR Program Participation Agreement. Meet with an Industrial STAR Energy Coach to discuss ideas for improving energy efficiency and develop a list of potential projects. Your Energy Coach will identify the projects that qualify for incentives and help prioritize opportunities by quantifying the energy savings and cost impacts.

Your Energy Coach will help develop a Project Feasibility Study (PFS) for eligible projects. The PFS documents the opportunities in detail and collects required program information.

2 OBTAIN SOCALGAS APPROVAL

Your Energy Coach will work with you to develop and submit an Industrial STAR Custom Project Application. SoCalGas will review the application, and upon approval, issue a Conditional Incentive Reservation (CIR) that includes the estimated incentive amount. For customers pursuing OBF, your Energy Coach will also work with you to complete a Loan Agreement.

IMPORTANT:

Custom projects must be approved by SoCalGas before equipment is ordered, purchased or installed.

3 PURCHASE AND INSTALL EQUIPMENT

Once you receive a CIR, purchase and install the energy upgrade using your staff, contractor, or supplier of your choice.

After the system is fully installed and commissioned, your Energy Coach will work with you to document project costs and verify post-installation energy savings in an Installation Report.

4 RECEIVE CHECK

The Installation Report is reviewed and approved by SoCalGas, and an incentive check is issued based on final project costs and verified energy savings. For customers pursuing OBF, a loan modification may be in order to reflect the achieved energy savings and keep monthly billing neutral compared to pre-installation energy costs.

Customers will receive a short customer service survey as an opportunity to provide feedback on the Industrial STAR services and processes.
