This form is for requesting to schedule the extension of multiple stub services only. This is not a contract. The SoCalGas Planning Representative will contact you for future scheduling information once the worksheet has been submitted to the SoCalGas planning department and all information has been verified. This worksheet does not guarantee, nor does it imply that stub services will be extended at the date requested. Please note that requested dates are only estimates and are subject to change. Equipment and material lead times, labor availability, regulatory approvals, right-of-way negotiations, and/or other unforeseen events could delay the actual stub service extension dates. Stub service extension dates are also contingent on customer satisfying all of their obligations with respect to the project.

Requestor's Signature (Required)

Please ensure recorded, city-approved address lists are provided to SoCalGas Planning Representative prior to submittal of this request.

Please enter the name of your SoCalGas Planner(s) in the box below, if assigned.
