

## Estimated Project Costs & Timelines for New Business Service

	Accessory Dwelling Unit (ADU)	Single Family	Multi-Family
Average total days	46	92	106
Estimated Cost	Estimated cost is \$500-\$4,500 Average cost is \$2,100	Utilize Cost Estimator Tool for Single Family	Utilize Cost Estimator Tool for Single Family then add \$500-\$1500 per meter

Timelines reflect the minimum and maximum range of project durations, which includes typical Utility, Municipality, and Customer dependencies.

**Disclaimer:** The above estimated project costs and timelines for the listed facility types are based on historical data from prior projects. They are provided solely as a general planning guide for new residential gas service projects. Actual costs and schedules may vary significantly due to factors including, but not limited to:

- Service distance and site-specific conditions
- Demand requirements
- Pipeline capacity and/or availability in the project area
- Permitting and inspection timelines
- Material and equipment availability
- Weather conditions and other unforeseen circumstances
- Applicable refunds, discounts, or allowances (if eligible)

SoCalGas expressly disclaims any liability for reliance on these estimates. All estimates are subject to change without notice and may be revised at SoCalGas's sole discretion.

Final design specifications, cost estimates, and advance payment requirements will be determined only after the customer completes an online application, provides all required information, and meets with a SoCalGas Planning Representative. No work will commence until all contractual requirements are satisfied and SoCalGas issues written confirmation.

They do not represent a binding offer, guarantee, or commitment by Southern California Gas Company ("SoCalGas") and should not be relied upon for budgeting or scheduling purposes."
