

**APPLICATION OF SOUTHERN CALIFORNIA GAS COMPANY FOR ANGELES LINK PHASE 1
REASONABLENESS REVIEW (DATA REQUEST Cal PA-SCG-05)**

Date Requested: January 22, 2026, Submitted: February 5, 2025

In its Response to Cal Advocates-SCG-A2506011-002 SoCalGas makes references to “localized hub,” “localized hydrogen hub solution, under the specifications required to be eligible for federal funding provided through the Infrastructure Investment and Jobs Act,” “localized hub solution,” and “localized hydrogen hub.”

The Angeles Link Phase I Consolidated Report notes that ARCHES included two “segments” of Angeles Link in its California Hydrogen Hub Application: one in the San Joaquin Valley and another extending from Lancaster to the Los Angeles Basin.¹

Provide an individual response for each of the following questions.

QUESTION 1: How does SoCalGas define the “localized hub”? Provide a word description and a map.

RESPONSE 1:

SoCalGas objects to this request on the grounds it is unduly burdensome to the extent this information is equally available to the requesting party. Subject to and without waiving the foregoing objection, SoCalGas responds as follows. Please refer to the Project Options and Alternatives Study (Alternatives Study), Section 7.1.1 at pages 115-117, which defines the localized hub and provides a map.

QUESTION 5: Are the Angeles Link “segments” included within ARCHES the same as any of SoCalGas’ definitions of “hub” in Questions 1-4? If so, explain specifically which hub is referenced.

RESPONSE 5:

The two “segments” of Angeles Link that ARCHES included to be part of its California Hydrogen Hub Application are not the same as the definitions of “hub” as stated in Questions 1-4.
