2EV001.001 - ENVIRONMENTAL

Area: SUSTAINABILITY & ENVIRONMENTAL
Witness: Albert J. Garcia
Category: A. Env Svcs and Strategic Planning & Reg Policy
Category-Sub: 1. Non-Shared Total
Workpaper: 2EV001.001 - ENVIRONMENTAL
Unit Measure: FTEs

Activity Description:

SoCalGas's Environmental Services organization consists of employees who provide guidance and support to SoCalGas on compliance in the areas of natural resources, water quality, land use planning, hazardous materials and waste (HazMat), air quality, greenhouse gas emissions, and sustainability. Environmental Services assists in SoCalGas' efforts to comply with federal, state, regional, and local environmental laws, rules, regulations, and ordinances, as well as internal company policies and procedures. The organization obtains environmental permits and approvals, develops environmental programs, and conducts specialized environmental training.

Forecast Explanations:

Labor - Base YR Rec

A base year forecast methodology was used to determine cost requirements. This methodology is appropriate because it includes costs that are applicable to the oversight, leadership, and strategy of the overall Environmental Services department. The specific cost drivers and incremental costs are best applied to a base year spending level instead of using historical averages or trends that may not be reflective of recent spending patterns. The base year represents the most accurate manner of forecasting costs since it is the most recent and reliable indicator of current cost drivers for the department, which is expected to continue through the test year.

Non-Labor - Base YR Rec

A base year forecast methodology was used to determine cost requirements. This methodology is appropriate because it includes costs that are applicable to the oversight, leadership, and strategy of the overall Environmental Services department. The specific cost drivers and incremental costs are best applied to a base year spending level instead of using historical averages or trends that may not be reflective of recent spending patterns. The base year represents the most accurate manner of forecasting costs since it is the most recent and reliable indicator of current cost drivers for the department, which is expected to continue through the test year.

Workpaper: 2EV001.002 - RNERBA-AB32 Fees
Unit Measure: FTEs

Activity Description:

The New Environmental Regulatory Balancing Account (NERBA) is a regulatory balancing account intended to record costs meeting the following key criteria: (i) uncertainty as to the scope, magnitude and mechanics of the compliance requirements associated with new, proposed or evolving environmental rules or regulations; and (ii) potential for incurring significant incremental costs. Since 2010, SoCalGas has paid administrative fees as required by the California’s Global Warming Solutions Act of 2006 (“AB32”) which are intended for CARB to recover its costs to implement AB32. The AB32 (Cost of Implementation) COI fees are calculated based on the Greenhouse Gas (GHG) emissions from natural gas suppliers, in conjunction with the statewide carbon common cost (CCC), \$/MT CO2e that CARB sets every year. Since the GHG emissions fluctuate every year due to variations in the amount of natural gas supplied to customers (governed by market forces, weather conditions, economic settings, and other factors), there is uncertainty in the annual GHG emissions. Furthermore, the annual common cost of carbon (\$/ MT CO2e), is not a fixed value, and CARB has the authority to change it annually.

Forecast Explanations:

Labor - 4-YR Linear

N/A

Non-Labor - 4-YR Linear

The forecast method developed for this cost category is a four-year historical trend. This method is most appropriate because multiple years of data are available, there has been an increase in cost of the fees over time, and it is reasonable to assume this trend to continue.

Beginning of Workpaper
2EV001.003 - STRATEGIC PLANNING

Area: SUSTAINABILITY & ENVIRONMENTAL
Witness: Albert J. Garcia
Category: A. Env Svcs and Strategic Planning & Reg Policy
Category-Sub: 1. Non-Shared Total
Workpaper: 2EV001.003 - STRATEGIC PLANNING
Unit Measure: FTEs

Activity Description:

The Strategic Planning department is responsible for a broad range of initiatives, including long-term business strategy and goal setting, qualitative and quantitative analysis (e.g. identifying efficiencies), long-term energy system scenario planning, regulatory policy development and support for matters before the CPUC (e.g. GRC, rulemakings, and other applications).

Forecast Explanations:

Labor - Base YR Rec

A base year forecast methodology was used to determine cost requirements. This methodology is appropriate because the scope of work in the 2028 Test Year is expected to closely align to the 2025 base year, with greater focus on GRC base business-related strategy and other regulatory matters, making it a good representation of future costs. This method promotes accuracy and traceability to recent historical costs that consider the affordability and efficiency measures the company has undertaken.

Non-Labor - Base YR Rec

A base year forecast methodology was used to determine cost requirements. This methodology is appropriate because the scope of work in the 2028 Test Year is expected to closely align to the 2025 base year, with greater focus on GRC base business-related strategy and other regulatory matters, making it a good representation of future costs. This method promotes accuracy and traceability to recent historical costs that consider the affordability and efficiency measures the company has undertaken.

Cost Center: 2200-0261.001 - SVP - STRATEGY AND SUSTAINABILITY
Unit Measure: FTEs

Activity Description:

The Senior Vice President of Strategy, Financial Planning and Treasurer is responsible for leadership of the Strategic Planning (SoCalGas & SDG&E), Financial & Operational Planning (SoCalGas & SDG&E), and Gas Acquisition Departments. This role is a shared service and oversees development and implementation of several key activities, including SoCalGas's and SDG&E's strategic initiatives (i.e., medium- & long-term business strategy and goal setting), financial plans and budgets, cash management, treasury, and SoCalGas's procurement of natural gas and renewable natural gas for retail customers.

Forecast Explanations:

Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because it is the most recent and reliable indicator of current spending patterns for the cost center, which is expected to continue through the 2028 test year.

Non-Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because it is the most recent and reliable indicator of current spending patterns for the cost center, which is expected to continue through the 2028 test year.

Cost Center Allocation Percentage Drivers/Methodology:

Cost Center Allocation Percentage for 2025

Prior to the end of January 2026 this cost center is a non shared cost center used by the SVP of Strategy and Sustainability.

Cost Center Allocation Percentage for 2026

This cost center became a shared cost center starting February 2026 and is used by the SVP of Strategy, Financial Planning and Treasurer - SDGE & SCG. Allocation of the 40% to SDGE and 60% retained in SCG is based on the estimated level of activities the SVP role supports in both utilities.

Cost Center Allocation Percentage for 2027

This cost center became a shared cost center starting February 2026 and is used by the SVP of Strategy, Financial Planning and Treasurer - SDGE & SCG. Allocation of the 40% to SDGE and 60% retained in SCG is based on the estimated level of activities the SVP role supports in both utilities.

Cost Center Allocation Percentage for 2028

This cost center became a shared cost center starting February 2026 and is used by the SVP of Strategy, Financial Planning and Treasurer - SDGE & SCG. Allocation of the 40% to SDGE and 60% retained in SCG is based on the estimated level of activities the SVP role supports in both utilities.

Cost Center Allocation Percentage for 2029

This cost center became a shared cost center starting February 2026 and is used by the SVP of Strategy, Financial Planning and Treasurer - SDGE & SCG. Allocation of the 40% to SDGE and 60% retained in SCG is based on the estimated level of activities the SVP role supports in both utilities.

Activity Description:

The Senior Director of Strategic Planning and Regulatory Policy oversees, leads, and directly manages the Strategic Planning Department. In this capacity, the Senior Director is responsible for development and implementation of the Company's key strategic initiatives , including medium and long-term business strategy and goal setting, qualitative and quantitative analysis, and regulatory policy development and support. The Senior Director became a shared service support function to the SVP of Strategy , Financial Planning and Treasurer in February 2026, and has responsibility for both SDG&E and SoCalGas.

Forecast Explanations:

Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because it is the most recent and reliable indicator of current spending patterns for the cost center, which is expected to continue through the 2028 test year.

Non-Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because it is the most recent and reliable indicator of current spending patterns for the cost center, which is expected to continue through the 2028 test year. This method promotes accuracy and traceability to recent historical costs that consider the affordability and efficiency measures the company has undertaken.

Cost Center Allocation Percentage Drivers/Methodology:

Cost Center Allocation Percentage for 2025

Prior to the end of January 2026 this cost center is a non shared cost center used by the Director of Strategic Planning Department.

Cost Center Allocation Percentage for 2026

This cost center became a shared cost center starting February 2026 and is used by the Director of Strategic Planning & Regulatory Policy who supports the SVP of Strategy, Financial Planning and Treasurer - SDGE & SoCalGas. Allocation of the 20% to SDGE and 80% retained in SoCalGas is based on the estimated level of activities the director role supports in both utilities.

Cost Center Allocation Percentage for 2027

This cost center became a shared cost center starting February 2026 and is used by the Director of Strategic Planning & Regulatory Policy who supports the SVP of Strategy, Financial Planning and Treasurer - SDGE & SoCalGas. Allocation of the 20% to SDGE and 80% retained in SoCalGas is based on the estimated level of activities the director role supports in both utilities.

Cost Center Allocation Percentage for 2028

This cost center became a shared cost center starting February 2026 and is used by the Director of Strategic Planning & Regulatory Policy who supports the SVP of Strategy, Financial Planning and Treasurer - SDGE & SoCalGas. Allocation of the 20% to SDGE and 80% retained in SoCalGas is based on the estimated level of activities the director role supports in both utilities.

Cost Center Allocation Percentage for 2029

This cost center became a shared cost center starting February 2026 and is used by the Director of Strategic Planning & Regulatory Policy who supports the SVP of Strategy, Financial Planning and Treasurer - SDGE & SoCalGas. Allocation of the 20% to SDGE and 80% retained in SoCalGas is based on the estimated level of activities the director role supports in both utilities.

Category-Sub: 1. Shared Total
Cost Center: 2200-2176.000 - ENVIRONMENTAL AIR QUALITY & CLIMATE PROG
Unit Measure: FTEs

Activity Description:

The Air Quality/GHG Support group within Environmental Services provides internal support for compliance with rules and regulations relating to air quality and greenhouse gas emissions.

Forecast Explanations:

Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because the base year is representative of the cost expectations for the 2028 test year and therefore the most recent expenses were used as a basis for the forecast.

Non-Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because the base year is representative of the cost expectations for the 2028 test year and therefore the most recent expenses were used as a basis for the forecast.

Unit Measure: FTEs

Activity Description:

The Environmental Field Services group has staff that provide air quality subject matter expertise supporting compliance with rules from the nine Air Pollution Control Districts within SoCalGas and SDG&E's service territories. The shared services allocation is primarily driven by support for the Moreno Compressor Station, operated in Riverside County area which is an SDG&E asset.

Forecast Explanations:

Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because the base year is representative of the cost expectations for the 2028 test year and therefore the most recent expenses were used as a basis for the forecast. Known adjustments expected to continue through the test year have been made to reflect personnel updates.

Non-Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because the base year is representative of the cost expectations for the 2028 test year and therefore the most recent expenses were used as a basis for the forecast. Known adjustments expected to continue through the test year have been made to reflect personnel updates.

Beginning of Workpaper
2200-2588.000 - FIELD ENVIRONMENTAL SERVICES - TRANSMISS

Area: SUSTAINABILITY & ENVIRONMENTAL
Witness: Albert J. Garcia
Category: A. Envl Svc and Strategic Planning & Reg Policy
Category-Sub: 1. Shared Total
Cost Center: 2200-2588.000 - FIELD ENVIRONMENTAL SERVICES - TRANSMISS
Unit Measure: FTEs

Activity Description:

The Environmental Field Services group manages and maintains environmental compliance and permitting support for the company's natural gas storage facilities, compressor stations, gas operations and customer service bases, and other facilities throughout SoCalGas' service territory.

Forecast Explanations:

Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because the base year is representative of the cost expectations for the 2028 test year and therefore the most recent expenses were used as a basis for the forecast. Known downward adjustments expected to continue through the test year have been made to reflect personnel updates.

Non-Labor - Base YR Rec

A base year forecasting methodology was used to forecast labor and non-labor costs for this cost category. This method is most appropriate because the base year is representative of the cost expectations for the 2028 test year and therefore the most recent expenses were used as a basis for the forecast. Known downward adjustments expected to continue through the test year have been made to reflect personnel updates.
