 Significant milestones

STAY TUNED FOR UPCOMING COMMUNITY EVENTS!

To better understand the needs of our community, SoCalGas is partnering with local organizations throughout our service territory.

Together, we will develop equitable and inclusive strategies to help plan for the impacts of climate change.

Watch for upcoming engagement opportunities!

 **SoCalGas**[™]

PREPARING FOR CALIFORNIA'S ENERGY FUTURE

Providing increasingly **clean, safe and reliable** energy.

LEARN MORE ABOUT WHAT WE ARE DOING TO BUILD THE CLEANEST, SAFEST AND MOST INNOVATIVE ENERGY INFRASTRUCTURE COMPANY IN AMERICA.

ABOUT SOCALGAS

SAFE. RELIABLE. CLEAN ENERGY.

For more than 150 years, SoCalGas has continued to provide essential services to homes and communities in Central and Southern California.

 > **21 million customers**
in the service area

 > **5.9 million meters**
of pipeline

 > **24,000 square miles**
of Central and Southern California

 > **500 communities**
in the region

OUR VALUES ARE:

DO THE RIGHT THING

CHAMPION PEOPLE

SHAPE THE FUTURE

SOCALGAS' COMMITMENT

As the operator of the nation's largest gas infrastructure, serving more than 21 million customers, we believe every Californian deserves a clean, affordable, and resilient energy future.

In April 2018, the California Public Utilities Commission (CPUC) issued the **Order Instituting Rulemaking (OIR)** to Consider Strategies and Guidance for Climate Adaptation, Rulemaking 18-04-019.

This proceeding issued new guidelines for investor-owned utilities, like SoCalGas, to upgrade infrastructure, operations, and services to adapt to climate change including a vulnerability assessment of its infrastructure and the completion of a community engagement plan.

WHAT IS CLIMATE ADAPTATION?

As described in 18-04-019, climate adaptation is the ability of communities and utility companies to adapt to infrastructure to potential climate hazards.

PREPARING CALIFORNIA FOR THE FUTURE

SoCalGas is preparing for potential climate change impacts so we can continue to provide our customers with safe, reliable and affordable service. As part of this preparation, and as directed by the CPUC, SoCalGas is working with our communities to develop a **Vulnerability Assessment and Community Engagement Plan**.

WHAT IS A VULNERABILITY ASSESSMENT?

SoCalGas will examine the impacts of potential climate hazards on its infrastructure, operations, and services. This assessment enables SoCalGas to draft climate adaptation plans for future infrastructure needs.

WHAT IS A COMMUNITY ENGAGEMENT PLAN?

Your input is crucial to planning California's energy future. The Community Engagement Plan is the layout for how SoCalGas will engage with our communities, especially those that have been historically underrepresented, on climate adaptation related to the utilities' infrastructure, operations, and services.
