(U 338-E)

***Southern California Edison Company's Energy
Efficiency Rolling Portfolio Business Plan For 2018-
2025***

Before the
Public Utilities Commission of the State of California

Rosemead, California
January 17, 2017

SCE’s Energy Efficiency Rolling Portfolio Business Plan for 2018-2025

Table Of Contents

Section	Page	Witness
I. Introduction & Organization.....	1	M. Wallenrod
II. SCE’s Vision for EE in California.....	4	
III. Portfolio Summary.....	7	
A. Portfolio Overview, Vision, and Goals.....	7	
1. Portfolio Overview.....	7	
2. Portfolio Vision.....	8	
3. Portfolio Goals.....	9	
B. Portfolio Drivers.....	11	
1. Regulatory and Legislative Policies.....	11	
2. General EE Market Trends.....	12	
3. Market Barriers.....	13	
C. Intervention Strategies.....	14	
D. Solicitation Approach.....	16	
1. Background.....	16	
2. SCE’s Current Solicitations.....	16	
3. SCE’s Proposed EE Solicitation for Innovation.....	17	
4. Plan to Increase Third-Party EE.....	19	
5. Peer Review Group / Independent Evaluator Proposal.....	20	
E. Statewide Administration Approach.....	21	
1. Background.....	21	
2. Upstream and Midstream Programs.....	22	
3. Downstream Programs.....	24	
4. Clarifications Regarding Statewide Administration.....	25	
a) Ability to Opt Out of Statewide Program or Subprogram Activities.....	25	
b) Pilot Activities Should be able to be Administered Locally Until They Are Ready for Statewide Administration.....	26	
F. Portfolio Budget.....	26	
G. Portfolio Savings.....	29	
H. Portfolio Cost-Effectiveness.....	30	
I. Portfolio Performance Metrics.....	31	
J. Integration with Other DSM Activities.....	32	
1. Demand Response (DR).....	32	
2. Residential Rate Reform.....	34	
3. Integrated Demand-Side Resources (IDSRs).....	36	
4. Zero Emission Vehicles.....	36	
5. Energy Savings Assistance (ESA) Multi-Family Focused.....	37	
IV. Residential Sector.....	39	T. Weber

1 renewable energy, alternative fueled vehicle infrastructure, energy storage, DR, and water saving
2 measures. As local governments adopt ZNE ordinances using resources from the C&S program,
3 provide ZNE support from the Planning and Coordination Subprogram to the building industry.

4 c) Proposed New Subprograms

5 **National and International Standards Advocacy Subprogram:** This
6 new subprogram will focus on national and international regulations including voluntary codes,
7 standards, and testing procedures that directly and indirectly affect IOU customers in California.
8 The C&S program will increase engagement and coordination with interested California
9 delegations to increase alignment between national and international standards and California
10 goals.

11 **Code Readiness Subprogram:** This subprogram is specific only to
12 PG&E with much of the same work completed through SCE’s C&S Program (under Planning
13 and Coordination and Reach Codes subprograms), ETP, and in conjunction with EE incentives
14 programs, EM&V, and other internal SCE organizations.

15 **6. Discussion of Opportunities and Near, Mid, and Long-Term Strategies**

16 Moving toward code-directed industry transformation goals, the C&S 2.0
17 Program will continue successful program elements and platforms while expanding operations
18 and effectiveness within the cross-cutting sector. The new opportunities and strategies are
19 informed via various inputs and experiences, including public workshops, compliance-related
20 training and outreach, and state agency feedback. The intervention strategies and tactics listed
21 below are organized by subprogram, but some may be implemented across subprograms. For
22 this section of the cross-cutting sector chapter, the subprograms act as strategies.

23 a) Planning and Coordination Subprogram

24 **Background.** Since 2013, the CPUC emphasized the need for a more
25 integrated process for coordinating C&S activities throughout all of the IOUs’ EE sectors.³¹⁶ In

³¹⁶ D.12-05-015 p. 246.

1 response to SB 350 requirements. The study is expected to inform the current and future state of
2 contractor requirements for retrofit and maintenance programs as well as opportunities and
3 challenges associated with implementing such a policy. The roadmap also identifies a relevant
4 upcoming IOU study (Course Outcomes Study), that is expected to gather information in service
5 of better understanding how the WE&T course content affects or is relevant to the jobs of those
6 who attended. Based on objectives outlined in the business plans, the study will consider
7 specified longer term outcomes that have not yet been examined in assessments of the program's
8 impact on the workforce. As noted above, assessing the effectiveness of educational programs
9 such as WE&T will likely require a complex approach and a number of measurements and
10 assumptions that tie to relevant longer term market transformation indicators.
