Southern California Gas Company Projected Medical Cost For Years 2022-2024

ASSUMPTIONS				
	Dec HC		Projected	
	2021	<u>2022</u>	<u>2023</u>	2024
1. Total headcount based on initial number of employees as of December 2021 plus estimated increases or decreases	8,178	8,725	9,374	9,713
each year provided by planners for their respective areas.				
2. Projected adjusted non-represented headcount is as follows:	3,884	4,374	4,688	4,873
3. Projected adjusted represented headcount is as follows:	4,294	4,351	4,686	4,840
4. Projected adjusted non-represented headcount on leave eligible for coverage is as follows:	60	67	67	67
5. Projected adjusted represented headcount on leave eligible for coverage is as follows:	300	300	300	300
6. Participation is based on the enrollment for each plan, active or leave and represented status (union or non union), and				
coverage level as a percentage of the total enrollment for 2022 as of October 2021 for the forecast.				
7. "Annual Employer Share of Premium" (b) for 2022 reflect actual premiums net of employee contributions.				
8. Increase in medical premium "Annual Employer Only Rates" (b) for 2022-2024 are based on the medical inflation				
projected by Willis Towers Watson, a certified actuarial firm.	Actual	6.25%	6.25%	6.25%
9. Retiree shift deduction is cost of the Kaiser HMO "Total ER Premium" shifted to the postretirement medical plans and				
calculated using percentages provided by Willis Towers Watson. This is done because medical rates for active				
employees and retirees under the age of 65 for the Kaiser HMO plan are negotiated together and therefore causes active				
rates to be higher than they would be if negotiated separately. The projected 2021 credit is based on credits taken through				
December 2021.				

10. Forecasted costs exclude executive officers as defined under Resolution E-4963 pursuant to Public Utilities Code Section 706, as enacted by Senate Bill 901.
