SECOND REVISED WORKPAPERS TO PREPARED DIRECT TESTIMONY OF KHAI NGUYEN ON BEHALF OF SOUTHERN CALIFORNIA GAS COMPANY

ERRATA

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

May 2023

Post-Test Year Ratemaking Workpapers – Second Revised - ERRATA

PROPOSED POST-TEST YEAR RATEMAKING MECHANISM – SCG

A. REVENUE REQUIREMENT

As described in my testimony (Exhibit SCG-40), SoCalGas's Post-Test Year (PTY) ratemaking mechanism proposes to adjust Test Year (TY) authorized revenue requirement in PTY's 2025, 2026 and 2027 for:

- 1. Labor and non-labor costs based on IHS Global Insight's (GI) forecast (Section B.1.),
- 2. Medical costs based on the Willis Towers Watson's actuarial forecast (Section B.2),
- 3. Capital-related revenue requirements using:
 - a) An escalated five-year average level of capital additions (Section C), and
 - b) A forecast for capital exceptions beyond TY 2024 (Section E).

The base margin amounts adopted in SoCalGas's TY 2024 are from the testimony of SoCalGas witness Ryan Hom (Exhibit SCG-39) and utilized throughout these workpapers. Table 1 below summarizes the total revenue requirement with SoCalGas's PTY ratemaking mechanism including Miscellaneous Revenues and Franchise Fees & Uncollectible (FF&U). FF&U is addressed in Section D.

Post-Test Year Ratemaking Workpapers – Second Revised - ERRATA

Table 1

Line	Description (\$ in millions)	PTY – 2025	PTY – 2026	PTY – 2027
No. 1	Total O&M Margin (Exc. FFU)	\$1,792.2	\$1,834.6	\$1,879.5
2	Medical Expense	\$1,792.2	\$1,034.0	\$1,879.3
			c= a	
3	Depreciation	95.1	67.3	
4	Taxes on Income	(22.5)	` /	` /
5	Taxes Other Than on Income	9.5	9.7	10.0
6	Return	96.1	46.1	45.2
7	Cost of Capital	-	-	-
8	PTY Capital Exception Related Costs (Exc. FF&U)	67.0	99.5	212.5
9	Total Capital-Related Costs (Exc. FFU) (Sum L3:L8)	245.1	203.6	318.6
10	Prior Year Capital Related Costs (Exc. FF&U)	2,362.8	2,608.0	2,811.6
11	FF&U	69.8	73.2	
12	Total Base Margin (Inc. FF&U) (L1 + L2 +L9+ L10 + L11)	4,573.6	4,828.6	5,202.1
13	Miscellaneous Revenues	117.4	117.4	117.4
14	Total Revenue Requirement (L12 + L13)	4,691.01	4,946.0	5,319.6
15	Revenue Requirement Increase \$	\$293	\$255	\$374
16	Revenue Requirement Increase %	6.66%	5.44%	7.55%

B. OPERATION & MAINTENANCE ("O&M") EXPENSES

The starting base for O&M escalation is the TY 2024 revenue requirement excluding miscellaneous revenues, capital related margin, medical expense, franchise fees, and uncollectibles (O&M Margin). Medical costs are escalated separately, as described below in Section B2. After the PTY O&M and medical expenses are escalated, these costs will be grossed up for FF&U using the factors authorized in the TY 2024.

1. Escalation of O&M (excluding medical): For simplicity in calculating PTY escalation, a single weighted average gas O&M utility input price index (GOMPI) is used to adjust O&M expenses to reflect the expected cost inflation of goods and services that SoCalGas will incur to serve its customers. The calculation of GOMPI is described in Mr. Scott Wilder's testimony (Exhibit. SCG-36). The PTY O&M revenue requirement is calculated below (differences due to rounding) in Table 2.

Post-Test Year Ratemaking Workpapers – Second Revised - ERRATA

Table 2

Line No.	O&M Expense Adjustment (\$ in millions)	TY - 2024	PTY – 2025	PTY – 2026	PTY – 2027
1	Prior Year O&M Margin		\$1,754.7	\$1,792.2	\$1,834.6
2	O&M Escalation Rate		2.14%	2.36%	2.45%
3	Attrition Year O&M Escalation (L1 * L2)		\$38	\$42	\$45
4	O&M Expense (L1 + L3)	\$1,754.7	\$1,792.2	\$1,834.6	\$1,879.5

2. Escalation of Medical Costs: Medical costs adopted in SoCalGas's TY 2024 will be escalated annually using Willis Towers Watson's medical escalation projections as described in the testimony of Debbie Robinson (Exhibit SCG-25). The associated revenue requirement prior to FF&U gross up is calculated below (differences due to rounding) in Table 3.

Table 3

Line No.	Medical Cost Adjustment (\$ in millions)	TY - 2024	PTY – 2025	PTY – 2026	PTY – 2027
1	Prior Year Medical Expense (net)		\$97.7	\$103.6	\$109.3
2	Medical Escalation Rate		6.00%	5.50%	5.00%
3	Attrition Year Medical Escalation (L1 * L2)		\$6	\$6	\$5
4	Medical Expense (L1+L3)	\$97.7	\$103.6	\$109.3	\$114.7

C. CAPITAL-RELATED

1. Five-Year Capital Additions Average: This section describes the development of PTY plant additions and other PTY rate base changes to determine the capital-related revenue requirement (authorized return, depreciation expense, tax). The recorded (2020-2021) plant additions are taken from historically recorded rate base. The recorded (2021) and forecasted (2022-2024) rate base components, plant additions and plant retirements are from the testimony and workpapers of Patrick Moersen (Exhibit SCG-31 and SCG-31-WP). Once each attrition year net plant additions are computed, incremental depreciation reserve, and deferred taxes are calculated in order to determine the rate base for each attrition year. The change in year over year rate base is then utilized to calculate the capital costs components of the revenue requirement.

Table 4

Line No.	Capital-Related Attrition (\$ in millions)	TY - 2024	PTY - 2025	PTY - 2026	PTY – 2027
1	Prior Year Capital-Related Costs		\$2,343.1	\$2,521.2	\$2,625.3
2	Capital-Related Attrition		178.128	104	106
3	Capital-Related Costs (L1+ L2)	\$2,343.1	\$2,521.2	\$2,625.3	\$2,731.4

The development of the PTY rate base and the derivation of individual revenue requirement components are described in detail below.

- 2. Rate Base: The starting point in developing rate base for each attrition year is the prior year plant in service. Weighted average (WAVG) net plant additions for the attrition year are added, and current year changes to the net depreciation and accumulated deferred tax reserve are made:
 - a) Weighted Net Plant Additions:
 - The starting point used for the plant additions for the PTY is a five-year average of plant additions. The five-year average comprises two years of recorded (2020-2021, refer to Table-7, Line 7) and three years of forecasted (2022-2024 from the test year RO model, see Table-9, Line 13) capital additions. Each year is escalated to test year dollars and then averaged (Table-6, Line 9-11). The five-year average is then escalated to 2025, 2026 and 2027 (Table-6, Line 12). The five-year average excludes certain programs 1 to prevent double counting when determining the five-year average.
 - Plant retirements for the PTY are also calculated using a five-year average of retirements. The five-year average is comprises two years of recorded (2020-2021, refer to Table-8, Line 7) and three years of forecasted (2022-2024) capital retirements from the Test Year RO model (Table-9, Line 14). Each year is escalated to test year dollars (Table-6, Lines 15-17) and then averaged. The resulting five-year average is then escalated to 2025, 2026 and 2027 (Table-6, Line 18). The five-year average excludes certain

Gas Integrity Management Programs (TIMP, DIMP, SIMP, GSEP).

Post-Test Year Ratemaking Workpapers – Second Revised - ERRATA

programs² to prevent double counting when determining the fiveyear average.

- 3) WAVG Net Plant Additions: Each PTY's WAVG net plant additions is calculated using the ratio of the prior year WAVG net plant additions balance to the prior year end of year (EOY) net plant additions balance multiplied by the attrition-year's EOY net plant additions. (Table-6, Line 2)
- 4) Change in Accumulated Depreciation Reserve: Each PTY's WAVG net depreciation reserve is calculated using the ratio of the attrition year WAVG plant in service balance to the prior year WAVG plant in service balance multiplied by the prior year's net depreciation reserve. Net depreciation reserve includes annual retirements, cost of removal and salvage. (Table-6, Line 5)
- b) Working Capital and Other: SoCalGas is not proposing to change the rate base elements of Materials and Supplies, Working Cash, Customer Advances for Construction, and deferred revenue from the Test Tear 2024 amounts. (Table 5, Line 4,5,7,8)
- c) Repair Deductions Rate Base Adjustment (2021 2043) (Table-5, Line 9): SoCalGas proposes to continue the amortization of this rate base adjustment as ordered in D.16-06-054, page 192, and adjusted for Tax Cuts & Jobs Act (TCJA) as discussed in the testimony and workpapers of witness Ragan Reeves (Exhibit SCG-33/Exhibit SCG-33-WP-Tax).
- d) Accumulated Deferred Taxes: 2017 Tax Cuts & Jobs Act Adj (Table-5, Line 11): SoCalGas calculated this rate base adjustment using the average rate assumption method (ARAM) as explained by witness Ragan Reeves (Exhibit SCG-33). SoCalGas proposes to continue the amortization of this adjustment into the PTYs.
- e) Change in Accumulated Deferred Taxes: Plant: Each PTY's WAVG accumulated deferred taxes is calculated using the ratio of

² Gas Integrity Management Programs (TIMP, DIMP, SIMP, GSEP).

the test year level of deferred taxes to the test year WAVG plant in service. (Table-5, Line 13)

f) Change in Accumulated Deferred Taxes – CIAC: Each PTY's WAVG accumulated deferred taxes is calculated using the ratio of the test year level of deferred taxes to the test year WAVG plant in service. (Table 5, Line 14)

The resulting Weighted Average Depreciated Rate Base and supporting calculations are shown in the tables below.

Post-Test Year Ratemaking Workpapers – Second Revised - ERRATA

- 3. Capital-Related Revenue Requirement Calculations: The capital-related revenue requirement components for each attrition year are calculated using the methodologies described below:
 - a) Depreciation Expense: Depreciation expense is calculated by multiplying the current PTY plant-in-service weighted average increase by the test year's system average depreciation rate. (Table-10, Lines 1-7)
 - b) Ad Valorem Tax: Ad Valorem Tax is calculated by multiplying the current attrition year additions by the test year's system ad valorem tax rate. (Table-10, Lines 8-12)
 - c) Payroll Tax: Payroll Tax is calculated by multiplying the prior year payroll taxes by the current attrition year labor escalation rate forecasted by Global Insight. (Table-10, Lines 13-15)
 - d) Long-Term Debt Cost: Long-Term Debt Cost is calculated by multiplying the attrition year change in weighted average rate base by the authorized weighted cost of Long-Term Debt. (Table-11, Lines 4-8)
 - e) Preferred Stock Cost: Preferred Stock Cost is calculated by multiplying the attrition year change in weighted average rate base by the authorized weighted return on Preferred Stock. (Table-11, Lines 9-15)
 - f) Common Equity Cost: Common Equity Cost is calculated by multiplying the attrition year change in weighted average rate base by the authorized weighted return on Common Equity. (Table-11, Lines 16-22)
 - g) Federal Tax Depreciation: Federal Tax Depreciation income tax expense is calculated by multiplying current attrition year additions by the test year's system average federal tax depreciation rate and by the federal income tax rate. (Table-12, Lines 1-9)
 - h) State Tax Depreciation: State Tax Depreciation income tax expense is calculated by multiplying the current attrition year additions by the test year's system average state tax depreciation rate and by the state income tax rate. (Table-12, Lines 10-18)

Post-Test Year Ratemaking Workpapers - Second Revised - ERRATA

- i) California Corporation Franchise Tax (Prior Year): Prior Year's state income tax is a deduction for federal income tax purposes. (Table-13, Lines 1-22)
- j) Gross Ups: All revenue requirement components which are not directly deductible for income taxes are grossed up for income taxes. These are Book Depreciation, State Tax Depreciation, Federal Tax Depreciation, Preferred Stock Cost, Common Equity Cost, and California Corporation Franchise Tax (Prior Year). All revenue requirement components are grossed up for FF&U using the factors referenced in Section D.

D. FRANCHISE FEES AND UNCOLLECTIBLE GROSS UP

Franchise Fees and Uncollectible Gross Up: The total resulting O&M will be grossed up for FF&U using the franchise fee factors of 1.2259% and the uncollectible factor of 0.310%. The calculation of the gross up factor is shown below:

Table 14

Line No.	Description	2024	2025	2026	2027

E. PTY CAPITAL EXCEPTION-RELATED COSTS

SoCalGas is proposing limited exceptions to the capital component of the post-test year mechanism, as described in my testimony. These limited exceptions are for capital projects that are either going into service in the post-test years or have capital that are proposed to be balanced in balancing accounts for which revenue requirement for each post-test year is needed for tracking of costs. The proposed capital exceptions are:

- Gas Integrity Programs
 - o Distribution Integrity Management Program (DIMP)
 - Transmission Integrity Management Program (TIMP)
 - Storage Integrity Management Program (SIMP)
 - o Facilities Integrity Management Program (FIMP)
 - o Gas Safety Enhancement Programs (GSEP)
- Customer Information System Replacement Program (CIS)
- Honor Rancho Compressor Modernization (HRCM)

Tables 15-35 provide the revenue requirements calculation for each of the proposed capital exceptions.
