If we received firm service, presumably, some tariff would apply. I don't think we have anything like that in place now.

Are you asking if we have a Tariff for how we serve SoCalGas?

Kindest Regards,

[REDACTED]

Understood. One of the things that might be good for the interim is pointing me to the correct tariff and any other related docs. If there's a process for securing firm service that exists and can be shared, would help as well.

Thanks!!

I just sent this request out. Not sure if we will have an answer by mid-next week but I will try.

Kindest Regards,

SoCal Gas is in the permitting stage of a project on the coast. As part of the environmental review process, SCG is looking into alternatives to the proposed project. One alternative is to receive firm deliveries at Kettleman from PG&E of up to 30 mmcf/day. SCG would deliver gas to Topock for redelivery at Kettleman. SCG is interested to know if firm capacity is available? For how long? (Could we sign a 10 year agreement for example). What are the rate design options, if any?

I'm sure this will invoke many questions on your side before you can answer, so ask away. Management is hoping for a draft by mid-next week, which I know is quick, so whatever you can do.

Thanks,

[REDACTED]

Good morning [REDACTED]

As this request does not pertain to the MEA, this would go to our sales team. I am adding the Manager, [REDACTED] who already works with SoCalGas with the As-Available and Firm transportation requests. [REDACTED] team can assess the request and work with your team to determine if PG&E can support it.

Kindest Regards,

[REDACTED]
